THE KILLER WHALE JOURNALS

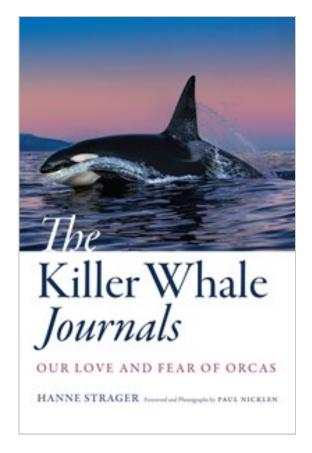

Our Love and Fear of Orcas

HANNE STRAGER, FOREWORD BY PAUL NICKLEN

Experience the hauntingly beautiful world of orcas, and discover the stories that unfold when humans enter oceans alongside them.

When intrepid biology student Hanne Strager volunteered to be the cook on a small research vessel in Norway's Lofoten Islands, the trip inspired a decadeslong journey into the lives of killer whales—and an exploration of people's complex relationships with the biggest predators on earth. *The Killer Whale Journals* chronicles the now internationally renowned science writer's fascinating adventures around the world, documenting Strager's personal experiences with orcas in the wild.

Killer whales' incredible intelligence, long life spans, and strong family bonds lead many people to see them as kindred spirits in the sea. But not everyone feels this way—like wolves, orcas have been both beloved and vilified throughout human history. In this absorbing odyssey, Strager traces the complicated relationship between humans and killer whales, while delving into their behavior, biology, and ecology. She brings us along in her travels to the most remote corners of the world, battling the stormy Arctic seas of northern Norway with fellow biologists intent on decoding whale-song, interviewing First Nations conservationists in Vancouver, observing Inuit hunters in Greenland, and witnessing the dismantling of black market "whale jails" in the Russian wilderness of Kamchatka. Through these captivating stories, Strager introduces us to a diverse cast of characters and guides us through the world's wild waters, from fjords above the Arctic circle in Norway to the poaching-infested waters off Kamchatka. Featuring astonishing photographs from nature photographer Paul Nicklen, The Killer Whale Journals reveals rare and intimate moments of connection with these fierce, brilliant predators.

Hanne Strager (COPENHAGEN, DK) is a biologist, whale researcher, and the future Director of Exhibitions and Visitor Experience at The Whale, a museum in Norway set to open in 2025. She cofounded a whale center in Norway and has served as the Director of Exhibitions at the Natural History Museum of Denmark. She is the author of A Modest Genius: The Story of Darwin's Life and How His Ideas Changed Everything.

SHORTCHANGED

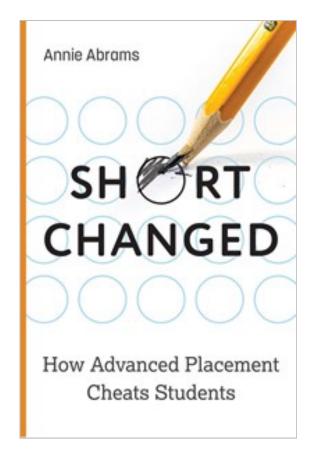

How Advanced Placement Cheats Students ANNIF ABRAMS

How the College Board's emphasis on standardized testing has led the AP program astray.

Every year, millions of students take Advanced Placement (AP) exams hoping to score enough points to earn college credit and save on their tuition bill. But are they getting a real college education? The College Board says that AP classes and exams make the AP program more accessible and represent a step forward for educational justice. But the program's commitment to standardized testing no longer reflects its original promise of delivering meaningful college-level curriculum to high school students.

In *Shortchanged*, Annie Abrams, education scholar and high school English teacher, uncovers the political and pedagogical traditions that led to the program's development in the 1950s. In revealing the founders' intentions of aligning liberal arts education across high schools and colleges in ways they believed would protect democracy, Abrams questions the collateral damage caused by moving away from this vision. The AP program is the College Board's greatest source of revenue, yet its financial success belies the founding principles it has abandoned.

Instead of arguing for a wholesale restoration of the program, *Shortchanged* considers the nation's contemporary needs. Abrams argues for broader access to the liberal arts through robust public funding of secondary and higher education and a dismantling of the standardized testing regime. *Shortchanged* illuminates a better way to offer a quality liberal arts education to high school students while preparing them for college.

WHO SPEAKS FOR YOU?

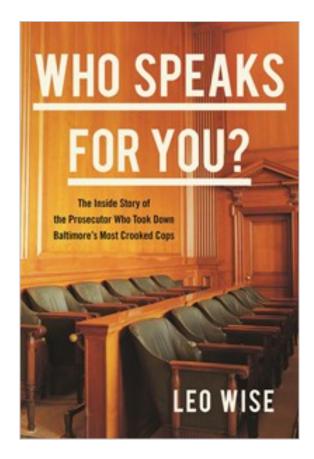

The Inside Story of the Prosecutor Who Took Down Baltimore's Most Crooked Cops

LEO WISE

The true story of how federal law enforcement flipped the playbook and convicted a corrupt unit of Baltimore police.

In 2015 and 2016, Baltimore was reeling after the death of Freddie Gray in police custody and the protests that followed. In the midst of this unrest, the Baltimore Police Department's Gun Trace Task Force (GTTF) roamed the city, robbing people, selling drugs and guns back onto the same streets they were supposed to be policing, and dividing the loot and profit among themselves. Created to trace guns back to the criminals responsible for Baltimore's high crime rates, instead, on March 1, 2017, all members of the GTTF were arrested on federal racketeering charges.

In Who Speaks for You?, Leo J. Wise, the lead prosecutor in the case, provides an inside look into the investigation and prosecution of this elite and corrupt task force. In the months following their arrest, four defendants pled guilty and agreed to testify against their former partners, leading to more charges being brought against additional officers. Wise shares the unbelievable twists and turns of the case, revealing not only what these officers did but how they were brought to justice. He dramatically recounts how his team put together their case, what happened during the trial and court proceedings, and how his team successfully prosecuted these corrupt police officers. This is his firsthand story of a once-in-a-generation police corruption case told from the perspective of the prosecutor who was intimately involved in every aspect of the investigation.

TOXIC EXPOSURE

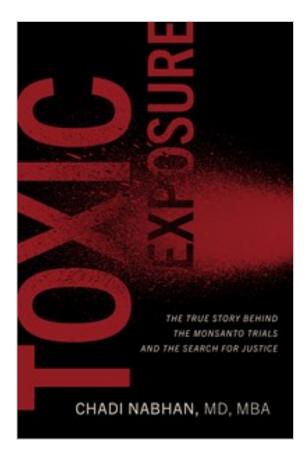

The True Story behind the Monsanto Trials and the Search for Justice

CHADI NABHAN

A behind-the-scenes look inside three key trials involving Monsanto's weed killer Roundup, cancer, and the search for justice-written by an expert witness medical oncologist who lived it all.

For years, Monsanto declared that their product Roundup, the world's most widely used weed killer, was safe. But that all changed in 2015, when the International Agency for Research on Cancer (IARC) analyzed data from scientific studies and concluded that glyphosate, the active ingredient in Roundup, is probably carcinogenic. The Environmental Protection Agency (EPA) disagreed, other regulatory agencies got involved, and scientists clamored to understand the link between glyphosate and cancer. *Toxic Exposure* tells the true story of numerous patients who developed non-Hodgkin lymphoma, a form of cancer, after using Roundup and their ensuing trials against Monsanto (now owned by Bayer, one of the largest agrochemical companies in the world). Written by Chadi Nabhan, MD, MBA, a cancer specialist, this is the only book written by an expert physician witness who testified in the first three trials against Monsanto.

Dr. Nabhan takes the reader behind the scenes of these pivotal trials, explaining key features of the cases, including how Monsanto downplayed the IARC's scientific conclusions, may have worked to change how the EPA classified glyphosate, and conducted extensive PR campaigns designed to minimize the public's perception of the negative health effects of its product. He also provides details about the other expert witnesses who reviewed the evidence, analyzed the science, and stood up to this agricultural behemoth in the courtroom. Dr. Nabhan tells the inside story of corporate influence, courtroom drama, legal discourse, monumental verdicts, and the ensuing media frenzy surrounding this massive uncovering of the truth and the years of scientific and legal work that led up to it.

THE CONVERSATION ON WATER

EDITED BY ANDREA K. GERLAK

From the contributors to The Conversation, a compelling essay collection on the world's water crises and the necessary steps to build a more sustainable and equitable water future for all.

Water-related crises are affecting more and more communities, both in the United States and internationally. If we continue to delay upgrading our infrastructure and addressing rising environmental concerns, we risk further destabilizing already strained systems—or, worse, causing a catastrophic collapse. In *The Conversation on Water*, water scholar and professor Andrea K. Gerlak collects essays from The Conversation U.S. on critical issues related to water from leading experts in everything from public policy to environmental engineering.

Gerlak pays special attention to the threats facing our water systems today—covering insufficient infrastructure, climate change, and pollution—and integrates them with essays on technologies for harvesting water and Indigenous knowledge in governing the oceans. She then proposes solutions that present opportunities for hope and reform. From new partnerships and collaborative efforts to alternative governance practices and new scientific tools and community approaches, readers will learn about viable pathways forward and will understand the deep social and political dimensions of water governance. Understanding these challenges is the first step toward building a more sustainable and equitable water future for all.

The Critical Conversations series collects essays from top scholars on timely topics, including water, biotechnology, gender diversity, gun culture, and more, originally published on the independent news site The Conversation U.S.

She is a coeditor of Agency in Earth System Governance and Mapping the New World Order. Gerlak has more than two decades of experience leading university-community environmental partnerships and consulting with international and national organizations on water policy and governance.

THE CONVERSATION ON GENDER DIVERSITY

EDITED BY JULES GILL-PETERSON

From contributors to The Conversation, a look at gender diversity in the twenty-first century and the intricate and intersecting challenges faced by trans and nonbinary people.

With media amplifying the voices of anti-trans legislators and critics, it is important to turn to the stories, research, and expertise of trans and nonbinary people in order to understand the reality of their experiences. In *The Conversation on Gender Diversity*, editor Jules Gill-Peterson assembles essential essays from The Conversation U.S. by experts on gender diversity. The essays guide readers through seldom-covered aspects of transgender history and present an overview of the social and political barriers that disenfranchise trans people and attempt to remove them from public life.

As these essays collectively show, trans and nonbinary people may be forced to be the face of gender and its diversity, but the cultural, political, and social realities of gender connect—and subject—everyone. Despite these challenges, there is an immense culture of love and support across the queer community that is bolstered by activists and allies working against transphobic attacks. Trans and gender-diverse youth are growing up in a world filled with ever-increasing hurdles and rising danger, even with the contemporary public recognition of trans life in culture and media. But they are not facing these challenges alone.

The Critical Conversations series collects relevant essays from top scholars on timely topics, including water, biotechnology, gender diversity, gun culture, and more, originally published on the independent news site The Conversation U.S.

THE CONVERSATION ON BIOTECHNOLOGY

EDITED BY MARC ZIMMER

From the contributors to The Conversation, this collection of essays by leading experts in biotechnology provides foundational knowledge on a range of topics, from CRISPR gene sequencing to the ethics of GMOs and "designer babies."

In *The Conversation on Biotechnology*, editor Marc Zimmer collects essays from The Conversation U.S. by top scholars and experts in the field, who present a primer on the latest biotechnology research, the overwhelming possibilities it offers, and the risks of its abuse. From an overview of CRISPR technology and gene editing in GMOs to the ethical questions surrounding "designer babies" and other applications of biotechnology in humans, it highlights the major implications biotechnology will bring for health and society. Topics range from the spectacular use of light to fire individual neurons in the brain to making plant-based meats; from curbing diseases with genetically modified mosquitoes to looking back on 40 years of opinions on IVF babies.

The Critical Conversations series collects essays from top scholars on timely topics, including water, biotechnology, gender diversity, gun culture, and more, originally published on the independent news site The Conversation U.S.

UNSETTLING

The El Paso Massacre, Resurgent White Nationalism, and the US-Mexico Border

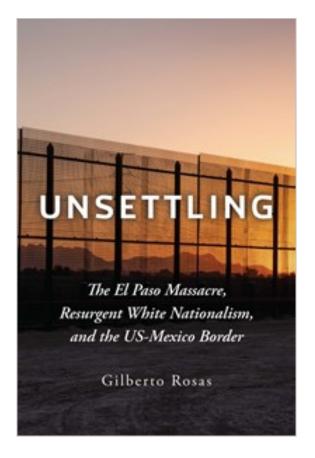

GILBERTO ROSAS

Documents the cruel immigration policies and treatment toward border crossers on the US-Mexico border.

On August 3, 2019, a far-right extremist committed a deadly mass shooting at a major shopping center in El Paso, Texas, a city on the border of the United States and Mexico. In *Unsettling*, Gilberto Rosas situates this devastating shooting as the latest unsettling consequence of our border crisis and currents of deeply rooted white nationalism embedded in the United States.

Tracing strict immigration policies and inhumane border treatment from the Clinton era through Democratic and Republican administrations alike, Rosas shows how the rhetoric around these policies helped lead to the Trump administration's brutal crackdown on migration-and the massacre in El Paso. Rosas draws on poignant stories and compelling testimonies from workers in immigrant justice organizations, federal public defenders, immigration attorneys, and human rights activists in order to document the cruelties and indignities inflicted on border crossers.

Borders, as sites of crossings and spaces long inhabited by marginalized populations, generate deep anxiety across much of the contemporary world. Rosas demonstrates how the Trump administration amplified and weaponized immigration and border policy, including family separation, torture, and murder. None of this dehumanization and violence was inevitable, however. The border zone in El Paso (which translates to "the Pass") was once a very different place, one marked by frequent and inconsequential crossings to and from both sidesand with more humane immigration policies, it could become that once again.

ON NIXON'S MADNESS

An Emotional History ZACHARY JACOBSON

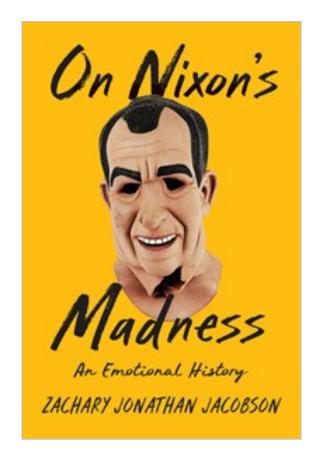

I Was Richard Nixon actually a madman, or did he just play one?

When Richard Nixon battled for the presidency in 1968, he did so with the knowledge that, should he win, he would face the looming question of how to extract the United States from its disastrous war in Vietnam. It was on a beach that summer that Nixon disclosed to his chief aide, H. R. Haldeman, one of his most notorious, risky gambits: the madman theory.

In *On Nixon's Madness*, Zachary Jonathan Jacobson examines the enigmatic president through this theory of Nixon's own invention. With strategic force and nuclear bluffing, Nixon attempted to coerce his foreign adversaries through sheer unpredictability. As his national security advisor Henry Kissinger noted, Nixon's strategy resembled a poker game in which he "push[ed] so many chips into the pot" that the United States' foes would think the president had gone "crazy."

From Vietnam, Pakistan, and India to the greater Middle East, Nixon applied this madman theory. Foreign relations were not a steady march toward peaceful coexistence but rather an ongoing test of mettle. Nixon saw the Cold War as he saw his life, as a series of ordeals that demanded great risk and grand gestures. For decades, journalists, critics, and scholars have searched for the real Nixon behind these acts. Was he a Red-baiter, a worldly statesman, a war criminal or, in the end, a punchline?

Jacobson combines biography and intellectual and cultural history to understand the emotional life of Richard Nixon, exploring how the former president struggled between great effusions of feeling and great inhibition, how he winced at the notion of his reputation for rage, and how he used that ill repute to his advantage.

BRAINSLEIF ØSTERGAARD

A short but engaging exploration of the brain.

In *Brains*, scientist Leif Østergaard explores our most complicated and mysterious organ. From the dissection of Einstein's brain to research on how to map networks of neurons, Østergaard deconstructs the different parts of the brain and provides an engaging overview of its essential functions. He explains how we store information in the synapses of neural networks and how these networks carry commands to our muscles and internal organs and receive sensory input from our skin, eyes, ears, nose, and mouth. Delving into the subconscious, we learn what our brains are doing while we sleep and how neurotransmitters play a role in addiction. In this fascinating book, Østergaard reveals how this enigmatic organ is even more complex than we thought it was.

In Reflections, a series copublished with Denmark's Aarhus University Press, scholars deliver 60-page reflections on key concepts. These books present unique insights on a wide range of topics that entertain and enlighten readers with exciting discoveries and new perspectives.

A short but engaging look at how to cultivate a sense of calm in our busy world.

In *Calm*, sound and media researcher Iben Have explores how to cultivate a feeling of calm using digital technologies, routines, and mindfulness training, and our own bodies and minds. Professor Have delves into the science behind human perception and sensory experience to discover that our perceptual experiences are not based on culture alone, but are rooted in a deeper, shared human phenomenon. While creativity generally requires calm, our need for peace and quiet varies greatly. Some people need lots of stimulus, whereas others feel most alert in tranquil environments. By determining the right stimulation zone, Professor Have outlines how we can perform and feel our best, existing mindfully and in the present.

In Reflections, a series copublished with Denmark's Aarhus University Press, scholars deliver 60-page reflections on key concepts. These books present unique insights on a wide range of topics that entertain and enlighten readers with exciting discoveries and new perspectives.

IMAGO BRIAN SWANN

An exuberant collection of poems celebrating art, nature, and humanity.

This various and vital poetry collection, in rich language and sharp detail, spans the rural and urban, country and town, and foreign and domestic. Tracing the vagaries of the self, these poems record and transmute biography from an English youth to the trials and challenges of aging in America. Memorable for its exuberant voice and exacting eye, Brian Swann's *Imago* is awake to the natural world as well as the world within. From the half-page title poem to the multisection "Elegiac," this volume is striking in its largeness, its tone evolving from self-indicting to ecstatic and self-transcendent. This collection, the author's fourteenth, is moving both as art and as testament.

Imago unfolds much like a piece of music. It is a continuum by which Swann sees nature and art interwoven in the ways they emerge and change. In "Grief and Magritte," Swann muses upon "all of us snagged in a net whose skeins tangle in night sky / where one star dreams another." The title poem focuses on an insect "on its way through the changes, the patterns / of what led up to it, the catches and releases . . . saying now, and now" till "splitting down the back" such changes "release what was always there." Brian Swann's poems, moving in their candor, read as though they have always been there, too.

HEALTH AND AND MELLINESS

DEMENTIA PREVENTION

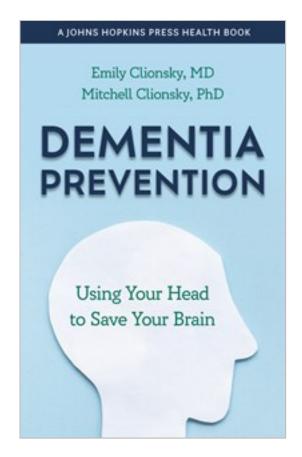

Using Your Head to Save Your Brain EMILY CLIONSKY AND MITCHELL CLIONSKY

Worried about memory loss and dementia risk? This new book will show you easy-to-follow steps to keep your brain healthy.

Emily Clionsky, MD, and Mitchell Clionsky, PhD, are a physician and neuropsychologist couple who have cared for their own parents with dementia, created a test used by doctors to measure cognitive function, and treated more than 25,000 patients with cognitive impairment. In *Dementia Prevention*, they combine the most current scientific findings about Alzheimer's disease and other dementias with their experience to present a practical guide that empowers you to improve your brain's future.

This book skips the fads, the unsupported claims of advertised products, and fringe theories. Instead, the authors guide you through a science-based tour of dementia, including how your brain works and how its function is affected by everything from blood circulation and blood pressure to sugar levels, medications, vision, and hearing. You will learn how your activity level, weight, habits, mental outlook, and social engagement may affect your likelihood of developing dementia.

Dementia Prevention provides a dementia risk checklist to better understand your personal risk profile to help you on your journey. The authors' training and experience as behavioral scientists will help you set better goals, identify roadblocks to success, and overcome these obstacles. Forgetfulness and confusion are not an inevitable part of growing older—you can make changes to keep your brain working well into your 70s and beyond. From how you breathe while you sleep to what you do socially and physically every day, Dementia Prevention will give you practical—and sometimes surprising—methods for you to protect your brain.

NEVER TOO LATE

Your Guide to Safer Sex after 60 SHANNON DOWLER

The ultimate—and fun!—guide to maintaining vibrant sexual health with aging.

In *Never Too Late*, Shannon Dowler, MD, a family physician who is also an expert on sexually transmitted diseases (STD), provides a refreshing overview of sexual education for people over 55. With the advent of dating apps, vibrant 55+ retirement communities, and sexual enhancement drugs, adults are sexually active well into their golden years. Unfortunately, the rates of STDs are dramatically increasing in older adults.

In entertaining, accessible language, Dr. Dowler presents relatable patient stories and hilarious rhymes that make for an easy and fun way to learn about safe sex. This guide covers important topics, including:

- How to identify the signs and symptoms of different STDs, including newer infections
- · The importance of regular screening
- Best sexual practices, including guidance on medications
- Preventative measures, tests, and treatments
- Guidance on how to broach difficult conversations with romantic partners and doctors
- Details about changing sexual trends, including dating apps, swinging, and normal aging changes that may impact your sexuality
- Conditions commonly confused with sexually transmitted infections, such as urinary tract infections, tick-related infections, and forms of dermatitis
- Advice on seeking medical care when uninsured or financially limited

Never Too Late will help you take charge of your sexual health and learn how to protect yourself and your current and future partners.

LIVING WELL WITH A SERIOUS ILLNESS

A Guide to Palliative Care for Mind, Body, and Spirit ROBIN BENNETT KANAREK

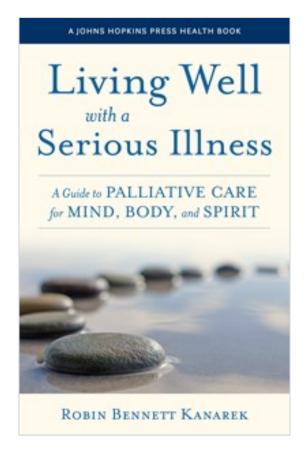

A practical guide for understanding how palliative care can improve quality of life for patients and their caregivers.

Robin Bennett Kanarek was a registered nurse working with patients suffering from chronic medical conditions when her ten-year-old son was diagnosed with leukemia. As her son endured grueling treatments, Robin realized how often medical professionals overlook critical psychological, emotional, and spiritual support for people with life-threatening illnesses. *Living Well with a Serious Illness* is the culmination of decades of Robin's work to advance the field of palliative care.

Although palliative care is often associated with hospice and end-of-life planning, Kanarek argues for a more expanded definition that incorporates palliative care earlier in patients' journeys. Living Well with a Serious Illness helps patients and their caregivers understand

- · what palliative care entails
- how to access the support they need when going through a serious illness
- · what questions to ask medical professionals
- · how to navigate advanced care planning
- definitions of common terminology used with end-of-life planning
- the importance of spiritual care, coping strategies, and emotional support
- how to become an advocate for palliative care

This book illuminates the importance of seeing patients as individuals who can benefit from care for their body, mind, and spirit—the core tenet of palliative care.

PROSTATE CANCER

Expert Advice for Helping Your Loved One

NEIL H. BAUM, DAVID MOBLEY AND RICHARD G. KEY

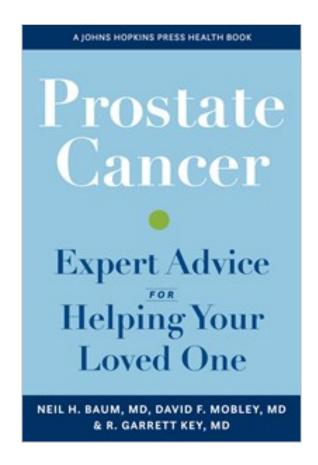

An illuminating guide for those newly diagnosed with prostate cancer as well as their partners and caregivers—one filled with extensive details about diagnosis, treatments, and tips for thriving.

The second leading cause of cancer death for men, prostate cancer affects more than a quarter of a million individuals in the United States each year. Most men with prostate cancer will go through the journey from diagnosis through treatment and beyond with a partner and family members by their side. But there are few resources available that address the needs of both those with cancer and their loved ones who want to help.

Written in accessible language and backed by the latest scientific research, *Prostate Cancer* covers

- symptoms, diagnosis, and testing;
- the full range of treatment options available;
- practical tools partners can use to assist their loved one;
- advice on managing the side effects of treatment, including incontinence and sexual problems;
- tips to help cope with the emotional challenges associated with cancer;
- recommendations for keeping healthy with diet, exercise, and mindfulness; and
- insights into insurance issues.

With three leading experts in urology, surgery, and psychiatry as its coauthors, *Prostate Cancer* provides the information and guidance you need to better understand the disease, communicate with health care providers, and support yourself and your loved one through treatment and survivorship.

THE GLAUCOMA GUIDEBOOK

Expert Advice on Maintaining Healthy Vision CONSTANCE OKEKE

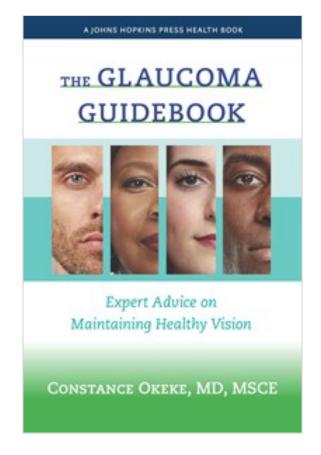

An easy-to-read yet thorough guide to understanding and managing glaucoma and taking care of your vision.

When you receive a glaucoma diagnosis, knowing where to turn and how to understand treatment options can be overwhelming. Fifty percent of people with glaucoma do not even know they have the disease, and those who do may still struggle with managing it. If left untreated, glaucoma can lead to irreversible blindness.

The Glaucoma Guidebook is an invaluable resource for anyone living with glaucoma and for those who are at high risk of developing the disease. Dr. Constance Okeke, an expert with over 20 years of experience helping thousands of patients see better, provides the critical advice and best practices needed to take control of your vision. In simple, accessible language, the book explains:

- What glaucoma is, including early symptoms
- What causes increased eye pressure
- Treatment options
- How to prevent blindness
- How to become an advocate for your own eye health

If you have been recently diagnosed with glaucoma or are struggling with managing your glaucoma, this is the book for you. With over 50 color images and illustrations and easy-to-follow advice from both Dr. Okeke and actual glaucoma patients, this book will not only serve as a guide for those with glaucoma but also provide invaluable information for family members, caregivers, eyecare providers, and educators.

WINNING WITH DIABETES

Inspiring Stories from Athletes to Help You Thrive

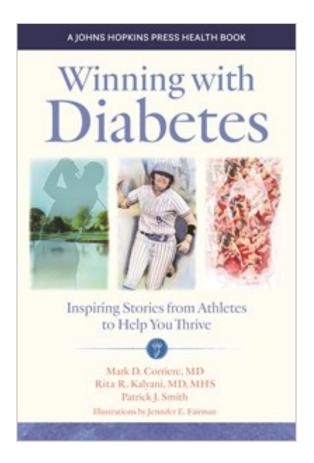

MARK D. CORRIERE, RITA R. KALYANI AND PATRICK J. SMITH, ILLUSTRATED BY JENNIFER E. FAIRMAN

Don't let diabetes send you to the bench. These motivational stories of top athletes with diabetes will inspire you to live your best life.

An ultra-marathoner, a three-time Olympic gold medalist, a major league pitcher, and an NFL star. What do these elite athletes have in common? They reached the top of their field—all while living with diabetes.

Essential reading for people who have diabetes and their families, *Winning with Diabetes* highlights the challenges, perseverance, and successes of sixteen elite athletes living with the disease. From mountain climber Will Cross, to college softball champion Kylee Perez, to NBA legend Dominique Wilkins, and many more, these are the real-life stories of diagnosis, adapting new day-to-day routines, finding support, training, competing, and connecting with communities of other people living with diabetes. The book features advice for facing common fears and challenges, both on and off the playing field. Each chapter includes interviews with athletes about their experiences, paired with expert commentary from the authors. Chapters also include summaries of key concepts, along with illustrations and other graphics.

Winning with Diabetes will inspire readers of all ages—those newly diagnosed as well as those who have lived with diabetes for years. Written by physicians who have set the standards for management of the disease, this book brings you expert insight into finding ways to live your best life. Let the experts, the athletes, and the inspiration in Winning with Diabetes give you what you need to you stay in the game.

OMEGA BALANCE

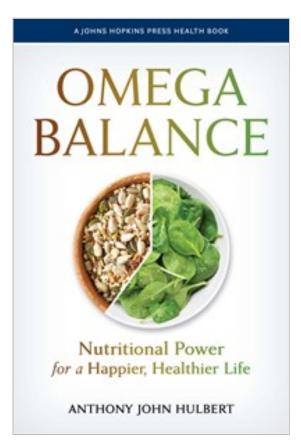

Nutritional Power for a Happier, Healthier Life ANTHONY JOHN HULBERT

Learn how to live a happier and healthier life by finding the right balance of omega fatty acids in your diet.

Omega-3 and omega-6 fatty acids are essential in the human diet. In *Omega Balance*, noted scientist Anthony J. Hulbert explains how the balance between these fatty acids in the human food chain has changed over the last half-century and the very serious negative health impacts this imbalance has created.

An imbalance of these omega fats contributes to increased rates of obesity, diabetes, cardiovascular diseases, allergies, asthma, as well as cancer and a variety of other inflammatory diseases. Omega balance is also important for normal brain function, and an imbalance in these fatty acids is associated with depression, mood disorders, and neurodegenerative diseases.

Hulbert provides extensive information on the omega balance of different foods and discusses fascinating details about human evolution, dietary changes throughout history, the effect of diet on human development and physiological processes, and more. He investigates the paleo diet of our ancestors and describes the dramatic changes that have accompanied the increased ultraprocessing of modern foods. *Omega Balance* is an essential guide to understanding a significant problem in our modern food chain and will make us rethink the food we eat.

MADNESS AT THE MOVIES

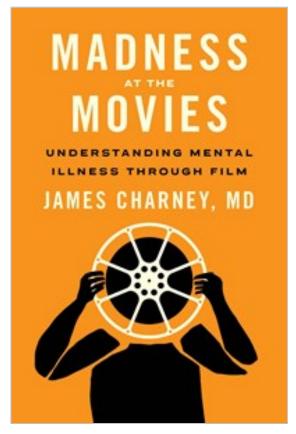

Understanding Mental Illness through Film JAMES CHARNEY

A unique exploration of how mental illness is portrayed in classic and contemporary films.

The study of classic and contemporary films can provide a powerful avenue to understand the experience of mental illness. In *Madness at the Movies*, James Charney, MD, a practicing psychiatrist and long-time cinephile, examines films that delve deeply into characters' inner worlds, and he analyzes moments that help define their particular mental illness.

Based on the highly popular course that Charney taught at Yale University and the American University of Rome, *Madness at the Movies* introduces readers to films that may be new to them and encourages them to view these films in an entirely new way. Through films such as *Psycho, Taxi Driver, Through a Glass Darkly, Night of the Hunter, A Woman Under the Influence, Ordinary People,* and *As Good As It Gets,* Charney covers an array of disorders, including psychosis, paranoia, psychopathy, depression, bipolar disorder, obsessive-compulsive disorder, and anxiety. He examines how these films work to convey the essence of each illness. He also looks at how each film reflects the understanding of mental illness at the time it was released as well as the culture that shaped that understanding.

Charney explains how to observe the behaviors displayed by characters in the films, paying close attention to signs of mental illness. He demonstrates that learning to read a film can be as absorbing as watching one. By viewing these films through the lens of mental health, readers can hone their observational skills and learn to assess the accuracy of depictions of mental illness in popular media.

HIGHER EDUCATION

IMMEASURABLE OUTCOMES

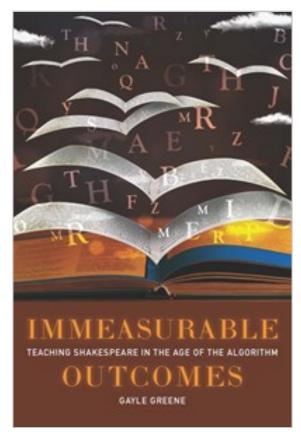

Teaching Shakespeare in the Age of the Algorithm GAYLE GREENE

What is the purpose of education? The answer might be found in a Shakespeare class at a small liberal arts college.

In this engaging account of teaching a Shakespeare class at a small liberal arts college, Gayle Greene illustrates what is so vital and urgent about the humanities. Follow along with Greene as she introduces us to her students and showcases their strengths, needs, and vulnerabilities, so we can experience the magic of her classroom. In *Immeasurable Outcomes*, Greene's class builds a complex human ecosystem that pushes students to think more deeply and discover their own interests and potential, all while recognizing the inherent dignity in other people's views and values.

Grounding her analyses in half a century of teaching, Greene pushes back against the demand for measurable student learning outcomes and the standardization imposed on K-12 schools in the name of reform. Instead, she draws her conclusions about education directly from the students themselves. Alumni testimonials describe the transformative power of a liberal arts education, recounting how their experience of community and engagement has provided them the tools to navigate the uncertainties of a rapidly changing world while also inspiring the social awareness our democracy depends on.

Immeasurable Outcomes rejects claims that the liberal arts are impractical, exposing the political agendas of technocrats and ideologues who would transform higher education into vocational training and programs focused only on profitability. Greene reminds us that the liberal arts have been the basis for the most successful educational system in the world and provides a powerful demonstration that education at a human scale that is relationship-rich and humanities-based should be the model for education in the future.

METRICS THAT MATTER

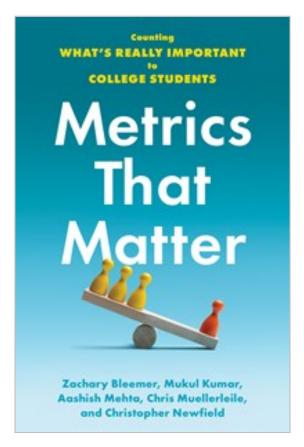

Counting What's Really Important to College Students ZACHARY BLEEMER, MUKUL KUMAR, AASHISH MEHTA, CHRIS MUELLERLEILE AND CHRISTOPHER NEWFIELD

Colleges sell themselves by the numbers—rankings, returns on investments, and top-ten lists—but these often mislead prospective students. What numbers should they really be paying attention to?

High school and college students are inundated by indicators and rankings supposedly designed to help them decide where to go to college and what to study once they arrive. In *Metrics That Matter*, coauthors Zachary Bleemer, Mukul Kumar, Aashish Mehta, Chris Muellerleile, and Christopher Newfield take a critical look at these metrics and find that many of the most popular ones are confusing, misleading, and—most importantly—easily replaceable by more helpful alternatives.

Metrics That Matter explores popular metrics used by future and current college students, with chapters focusing on colleges' return on investment, university rankings, average student debt, average wages by college major, and more. Written for students, their families, and the counselors who advise them, each chapter explains a common metric's fundamental flaws when used as a basis for making important educational decisions. The authors then draw on decades of scholarship from many academic fields to pair each metric with a concrete recommendation for alternative information, both qualitative and quantitative, that would be more useful and meaningful for students to consider. They emphasize that students should be thinking beyond solely using metrics when making college decisions—students should focus on their intellectual and academic education goals, not just vocational or monetary ones.

This book aims to facilitate important student decisions while reorienting public perceptions of higher education's values and how universities should measure their own success.

TRANSFORMING HISPANIC-SERVING INSTITUTIONS FOR EQUITY AND JUSTICE

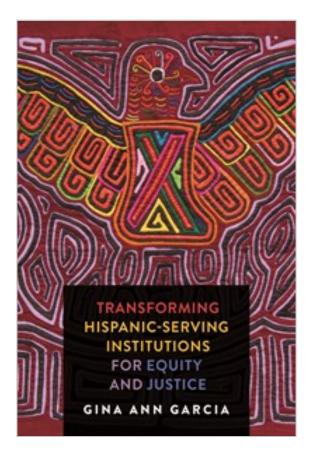

GINA ANN GARCIA

The framework to help Hispanic-Serving Institutions transform into spaces of liberation that promote racial equity and social justice.

Beyond having over a quarter of their undergraduate students be Hispanic, what makes Hispanic-Serving Institutions (HSIs) uniquely Latinx? And how can university leaders, faculty, and staff transform these institutions into spaces that promote racial equity, social justice, and collective liberation?

In *Transforming Hispanic-Serving Institutions for Equity and Justice,* Gina Ann Garcia argues that in order to serve Latinx students and other students of color, these institutions must acknowledge how whiteness operates across the organization, from the ways that it is governed and how decisions are made to how education and knowledge are delivered. Diversity alone is insufficient for achieving a dynamic learning environment within higher education institutions. Garcia's framework for transforming HSIs into truly Latinx institutions is grounded in critical theories, yet it advances new ways of thinking about how to organize colleges and universities that are actively serving students of color, low-income students, and students from other minoritized backgrounds. This framework connects multiple important dimensions, including mission, identity, strategic purpose, membership, curriculum, student services, physical infrastructure, governance, leadership, external partnerships, and external influences.

Drawing on over 25 years of HSI research, Garcia offers unique solutions for colleges and universities that want to better serve their students. With over 550 colleges and universities already eligible for the HSI designation, this book is a must-read for everyone in higher education.

AMERICAN HIGHER EDUCATION IN THE TWENTY-FIRST CENTURY

Social, Political, and Economic Challenges

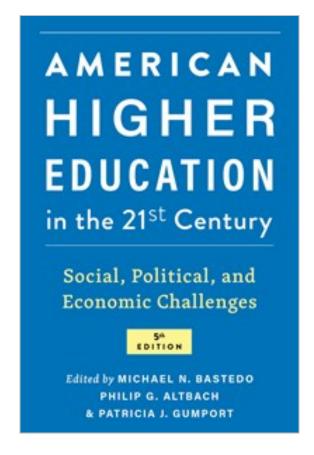

EDITED BY MICHAEL N. BASTEDO, PHILIP G. ALTBACH AND PATRICIA J. GUMPORT

Now in its fifth edition! An indispensable reference for anyone concerned with the future of American colleges and universities.

Whether it is advances in information technology, organized social movements, or racial inequality and social class stratification, higher education serves as a lens for examining significant issues within American society. First published in 1998, *American Higher Education in the Twenty-First Century* offers a comprehensive introduction to the complex realities of American higher education, including its history, financing, governance, and relationship with the states and federal government.

This thoroughly revised edition brings the classic volume completely up to date. Each chapter has been rewritten to address major recent issues in higher education, including the COVID-19 pandemic, the movement for racial justice, and turmoil in the for-profit sector. Three entirely new chapters cover broadaccess colleges, race and racism, and organized social movements. Reflecting on the implications of ethnic and socioeconomic diversity within higher education, the book also grapples with growing concerns about the responsiveness and future of the academy.

No other book covers such wide-ranging issues under the broader theme of higher education's relationship to society. Highly acclaimed and incorporating cutting-edge research, *American Higher Education in the Twenty-First Century* is now more useful and engaging than ever.

RESOURCE HANDBOOK FOR ACADEMIC DEANS

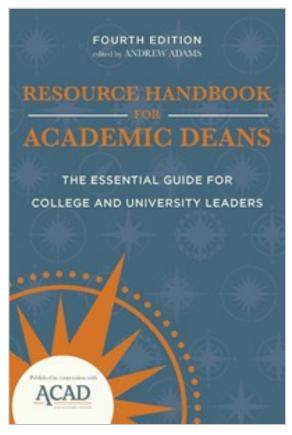

The Essential Guide for College and University Leaders EDITED BY ANDREW ADAMS

This essential guide addresses the expanding, multifaceted role of college and university academic leaders.

The new edition of the *Resource Handbook for Academic Deans*, one of the most important offerings to the academic community by the American Conference of Academic Deans, is written by and for academic leaders to address the expanding, multifaceted role of college and university administrators. Each chapter explores a topic related to how higher education leaders are influenced by national events, local partnerships, or on-campus collaborations. Among the topics covered are:

- · understanding educational policy at the national level
- working with leaders from department heads to provosts
- engaging with external partners
- leading collaborative change at small colleges and universities
- shifting toward student-centered campuses
- making data-informed decisions
- embracing diversity, equity, and inclusion
- managing and balancing salaries
- building effective leadership teams and mentoring future leaders
- holding difficult conversations

Providing helpful advice that can be studied in short chapters and inspiring content based on personal experience, the forty-three authors in this volume hold positions from department chairs to presidents at four-year and community colleges across the country. Written during the COVID-19 pandemic and amid calls for greater diversity, equity, and inclusion, each chapter offers perceptive insights from experienced leaders who serve a broad range of institutional types.

NINE GUIDING PRINCIPLES FOR WOMEN IN HIGHER EDUCATION

KARYN Z. SPROLES

Highlighting the nine guiding principles to help women succeed in their academic careers.

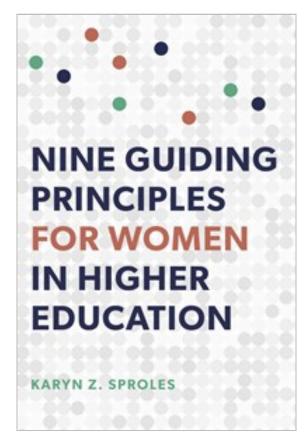

Although there are more women in higher education than ever before—and increasingly in leadership positions—their paths to success are more difficult than those paved for men. *Nine Guiding Principles for Women in Higher Education* is a concise and accessible resource aimed at helping women faculty succeed in their academic careers. Karyn Z. Sproles offers guidance, humor, and courage to women in higher education, paying particular attention to those with children and women of color.

Based on a wide range of scholarship, stories from dozens of women, and Sproles's personal experience from 34 years as a professor, department chair, and dean, *Nine Principles* offers advice on

- · facing down impostor syndrome,
- avoiding social isolation,
- building networks of mentors,
- preparing for tenure,
- balancing teaching, scholarship, and home life,

and more.

Practical and visionary, the nine principles guide readers from the beginning of their careers through to leadership roles. Women in academia will find the tools they need to balance success with the rest of life's demands. Each chapter ends with a quick list of advice for easy reference and suggested reading to explore more on the chapter's topic. Rounding out the book is a workshop section that can be used by individual readers or as a guide for conducting workshops and faculty development programs.

UNIVERSITIES ON FIRE

Higher Education in the Climate Crisis BRYAN ALEXANDER

Scientists agree that we are on the precipice of a global climate crisis. How will it transform colleges and universities?

In 2019, intense fires in the San Francisco Bay Area closed universities and drove afflicted people to shelter at other campuses. At the same time, extraordinary fires ravaged eastern Australia. Several universities responded by promising material and research support to damaged businesses while also hosting refugees and emergency response teams in student residence halls. This was an echo of the devastation wreaked by Hurricane Katrina on Tulane University in 2005.

In *Universities on Fire*, futurist Bryan Alexander explores higher education during an age of unfolding climate crisis. Powered by real-world examples and the latest research, Alexander assesses practical responses and strategies by surveying contemporary programs and academic climate research from around the world. He establishes a model of how academic institutions may respond and offers practical pathways forward for higher education. How will the two main purposes of education—teaching and research—change as the world heats up? Alexander positions colleges and universities in the broader social world, from town-gown relationships to connections between how campuses and civilization as a whole respond to this epochal threat.

Current studies of climate change trace the likely implications across a range of domains, from agriculture to policy, urban design, technology, culture, and human psychology. However, few books have predicted or studied the effects of the climate crisis on colleges and universities. By connecting climate research to a deep, futures-informed analysis of academia, *Universities on Fire* explores how climate change will fundamentally reshape higher education.

REPARATIVE UNIVERSITIES

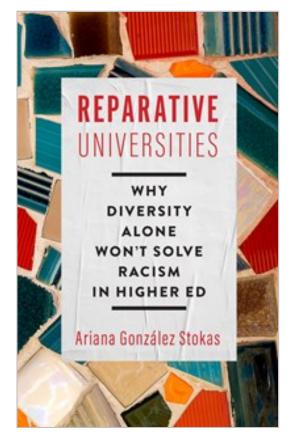

Why Diversity Alone Won't Solve Racism in Higher Ed ARIANA GONZÁLEZ STOKAS

A timely investigation of why diversity alone is insufficient in higher education and how universities can use reparative actions to become antiracist institutions.

As institutions increasingly reckon with histories entangled with slavery and Indigenous dispossession, diversity, equity, and inclusion (DEI) efforts occupy a central role in the strategy and resources of higher education. Yet reparation is rarely offered as a viable strategy for institutional transformation. In *Reparative Universities*, Ariana González Stokas undertakes a critical and decolonial analysis of DEI work, linking contemporary practices of diversity to longer colonial histories. González Stokas argues that diversity is an insufficient concept for efforts concerned with anti-oppression, anti-racism, equity, and decolonization. Given its historical ties to colonialism, can higher education foster reconciliation and healing?

Reparation is offered as a pathway toward untangling higher education from its colonial roots. González Stokas develops the term "epistemic reparation" to describe a mode of social-historical accountability that can already be seen at work in historical examples, as well as current events in the United States, South Africa, and Canada. Recent legal decisions by Georgetown University and the Princeton Theological seminary to enact economic recompense for buying and selling human beings are evidence of attempts to redress higher education's violent histories and the colonial structures they reproduce every day on college campuses.

Engaging with a broad range of theorists from decolonial philosophy to organizational psychology, González Stokas offers insight into why DEI efforts have been disconnected from past injustices and why unsettling diversity and engaging meaningful repair are critical for the future of higher education.

KNOWLEDGE TOWNS

Colleges and Universities as Talent Magnets

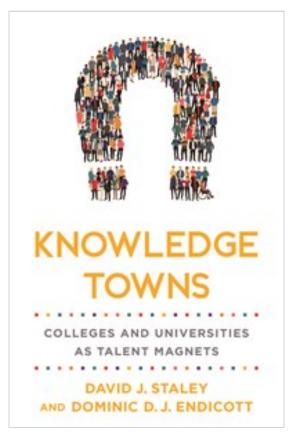

DAVID J. STALEY AND DOMINIC D. J. ENDICOTT

The remote work revolution presents a unique opportunity for higher education institutions to reinvent themselves and become talent magnets.

In *Knowledge Towns*, David J. Staley and Dominic D. J. Endicott argue that the location of a college or university is a necessary piece of any region's effort to attract remote knowledge workers and accelerate economic development and creative placemaking. Just as every town expects a church, bank branch, post office, and coffeehouse, Staley and Endicott write, we will see a decentralized network of institutions of higher education flourish, acting as cornerstones for the post-pandemic rebuilding of our society and economy.

In calling for a "college in any town," they are not simply proposing placing a traditional college within a town or city, but envisioning instead a particular kind of higher education institution called a "knowledge enterprise." In addition to providing the services of a traditional college, a knowledge enterprise acts as a talent magnet, attracting workers looking to move to cheaper and more attractive destinations.

With the post-COVID-19 shift to more remote work, and millions of people moving to more affordable and livable cities, a place that wants to attract talent will require a thriving academic environment. This represents a new opportunity for "town and gown" to create thriving collaborative communities. The pandemic has accelerated existing trends that put at risk the viability of many colleges and universities, as well as that of many towns and cities. The talent magnet strategy outlined in this book offers colleges and towns a plan of action for regeneration.

WEALTH, COST, AND PRICE IN AMERICAN HIGHER EDUCATION

A Brief History

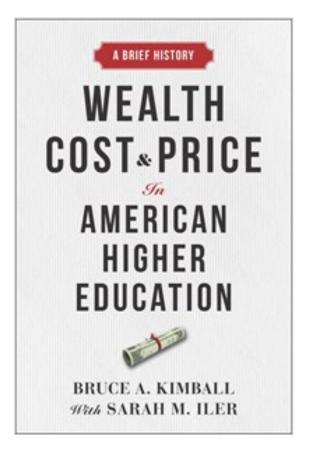

BRUCE A. KIMBALL, WITH SARAH M. ILER

Colleges and universities are richer than ever—so why has the price of attending them risen so much?

As endowments and fundraising campaigns have skyrocketed in recent decades, critics have attacked higher education for steeply increasing its production cost and price and the snowballing debt of students. In *Wealth, Cost, and Price in American Higher Education,* Bruce A. Kimball and Sarah M. Iler reveal how these trends began 150 years ago and why they have intensified in recent decades.

In the late nineteenth century, American colleges and universities began fiercely competing to expand their revenue, wealth, and production cost in order to increase their quality and prestige and serve the soaring number of students. From that era through today, the rising wealth and cost of higher education have continued to reinforce each other and spiral upward, increasing the heavily subsidized price paid by students. Kimball and Iler explain the strategy and reasoning that drove this wealth-cost double helix, the new tactics in fundraising and endowment investing that fueled it, and economists' efforts to understand it.

Using extensive archival, documentary, and quantitative research, Kimball and ller trace the shifting public perception of higher education and its correlation with rising costs, stagnating wages, and explosive student debt. They show how stratification of wealth in higher education became tightly interwoven with wealth inequality in American society. This relationship raises fundamental questions about equity in US higher education and its contribution to social mobility and democracy.

Sarah M. Iler (WAKE FOREST, NC) is adjunct professor of U.S. History at Columbus State Community College and Wake Technical Community College. She is the author or coauthor of essays on topics including the history of African American conservatism, the history of multicultural education, the history of liberal arts education, and the history of endowments in higher education.

SCHOLARLY AND AND PROFESSIONAL

WILDLIFE STEWARDSHIP ON TRIBAL LANDS

Our Place Is in Our Soul

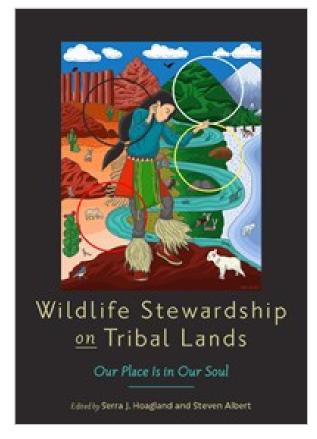

EDITED BY SERRA J. HOAGLAND AND STEVEN ALBERT

This groundbreaking book brings together Native American and Indigenous scholars, wildlife managers, legal experts, and conservationists from dozens of tribes to share their wildlife stewardship philosophies, histories, principles, and practices.

Tribes have jurisdiction over some of the healthiest wild areas in North America, collectively managing over 56 million acres of land. This is no accident: in addition to a deep reverence for the land and a strong history of environmental stewardship, Native peoples implement some of the best fish and wildlife preservation and management practices on the continent. *Wildlife Stewardship on Tribal Lands* is the first comprehensive resource dedicated to the voices and expertise of Native scholars and wildlife professionals. In its pages, nearly one hundred Native and non-native wildlife conservationists, managers, and their collaborators share lessons to guide wildlife professionals in how best to incorporate native methods and how to work effectively with tribal stakeholders. The authors cover topics that include:

- Guidelines for conducting research on tribal lands
- Traditional ecological knowledge-based management models
- The cultural and ecological importance of key species
- · Legal battles for treaty rights, management authority, and funding

Capturing oral histories and spiritual knowledge through interviews with tribal leaders and the work of Native artists and writers honors the holistic awareness of the land offered to readers of this unique volume. Ultimately, the contributors to Wildlife Stewardship on Tribal Lands demonstrate how tribal practices are pivotal guideposts for those seeking to protect and harness our natural resources in ways that can help reverse grievous biodiversity losses and ensure the health of our environment for future generations.

AN ILLUSTRATED GUIDE TO DINOSAUR FEEDING BIOLOGY

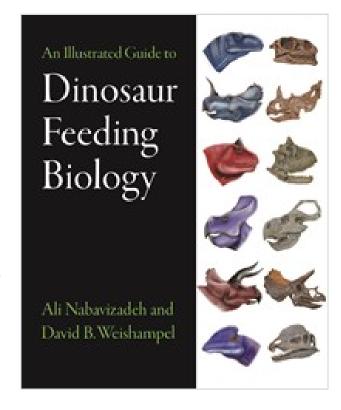

De rerum natura

ALI NABAVIZADEH AND DAVID B. WEISHAMPEL

This beautifully illustrated exploration of the diversity, anatomy, and evolution of dinosaur feeding adaptations is the first and only in-depth look at this crucial aspect of paleoecology.

In *An Illustrated Guide to Dinosaur Feeding Biology*, experts Ali Nabavizadeh and David B. Weishampel bring dinosaurs to life on the page by exploring and illustrating their feeding adaptations. Whether dinosaurs were carnivorous, herbivorous, or omnivorous, their evolution produced a multitude of specialized adaptations that helped shape their ecologies. Dinosaur skulls show a variety of bone and joint specializations ideal for withstanding stresses and strains induced by high bite forces with strong jaw musculature. The bladed, steak-knife dentition of many carnivorous dinosaurs was well-suited for slicing meat and crushing bones, while the leaf-shaped, sometimes tightly packed dentition of many herbivorous dinosaurs was ideal for grinding up a variety of plant material.

The first book of its kind, *An Illustrated Guide to Dinosaur Feeding Biology* is a synthesis of over a century of dinosaur feeding biology research, from the earliest hypotheses in the 1800s to today's studies using advanced techniques. Intended for both researchers and dinosaur enthusiasts alike, this book discusses functional morphological studies highlighting comparative anatomy, tooth wear, muscle reconstruction, and biomechanical analysis using modeling techniques like finite element analysis and multibody dynamics analysis. In addition to the feeding apparatus, Nabavizadeh and Weishampel explore postcranial adaptations and discuss the evolution of dinosaurs and their paleoecology more broadly. Integrating these various factors improves our understanding of dinosaurs as the living beings they were in their ecosystems millions of years ago and ultimately expands our knowledge and perspective of today's ecosystems by framing them in a broader evolutionary context.

FATAL JUMP Tracking the Origins of Pandemics LESLIE REPERANT

Exploring the fateful chains of events that gave rise to humanity's infectious diseases and pandemics.

Why do global pandemics like COVID-19 materialize? To address this question, we must dive into the world of pathogens that transcend their original host species and jump into new ones. Upon attempts to jump into new species, most pathogens fail to initiate infection or spread in the population. Only a few sustain onward chains of transmission, and even fewer sustain these indefinitely. Yet such fatal jumps have been at the origin of many of humanity's most dangerous infectious diseases.

In Fatal Jump: Tracking the Origins of Pandemics, Dr. Leslie Reperant analyzes the circumstances that have ignited the surge of new pathogens in humans. From the often-overlooked but crucial point of view of a veterinary disease ecologist, Reperant investigates mysteries such as how African-originated monkeypox left its home continent and shares behind-the-scenes insights into hugely destructive pathogens spread by ticks and mosquitos. Drawing from the latest science, she discusses whether we can predict these deadly jumps before they happen and what factors—environmental change, population dynamics, and molecular evolution—enable a pathogen to reach full pandemic status. Rich with recent scientific discoveries and emerging theories, this book spans a vast and diverse range of disciplines and weaves these insights into a holistic view of emerging infectious diseases. With new pathogens emerging at an ever-increasing pace, Fatal Jump reorients our perspective on infectious diseases and pandemics from the human-centered standpoint to the bigger picture. Only by recognizing the increasingly global nature of human society, and the connections between our planet's environmental health and our own health, will we understand what actions are necessary to reverse this trend.

PREPARING FOR THE NEXT GLOBAL OUTBREAK

A Guide to Planning from the Schoolhouse to the White House

DAVID C. PATE AND TED EPPERLY

Medical experts on the frontlines of the COVID-19 pandemic provide recommendations for governments, health agencies, and schools to prepare for the next outbreak.

Another pandemic is coming. The type, severity, and spread are unknown, but governments, public health agencies, schools, and all other organizations must be prepared in order to minimize damage and save lives. We need to identify the lessons learned from our successes and failures during the COVID-19 pandemic to plan better for our future response.

In Preparing for the Next Global Outbreak, David C. Pate, MD, JD, and Ted Epperly, MD, combine their decades of experience as doctors and health care leaders who have led their organizations through numerous public health challenges to create an extensive list of practical recommendations for a variety of organizations and agencies to better prepare for the next pandemic. They worked together in the fight against COVID-19 and the misinformation that devastated so many communities across the country. From the exam room to the public health board meeting room to the state capitol, Pate and Epperly use their expertise to craft 117 specific recommendations that organizations and governments can implement now in order to better prepare for the future. They divide these recommendations into checklists specific to different contexts: schools, hospitals, public health agencies, state governments, and the federal government. Public health officials, medical practitioners, state and local officials, school board members, disaster management leaders, and anyone with a stake in preparing their communities against future outbreaks will benefit from the recommendations Pate and Epperly outline.

This is the first book to apply lessons learned in real time during a pandemic while chronicling which responses did and did not work and why.

He has served as a member of the Governor's Coronavirus Working Group in Idaho to advise on the public health issues associated with the COVID-19 pandemic.

Ted Epperly, MD (BOISE, ID), is a board-certified family medicine physician and the president and CEO of Full Circle Health. For 15 years he served as a member of the board for Central District Health, the largest public health department in the State of Idaho.

BECAUSE DATA CAN'T SPEAK FOR ITSELF

A Practical Guide to Telling Persuasive Policy Stories
DAVID CHRISINGER AND LAUREN BRODSKY

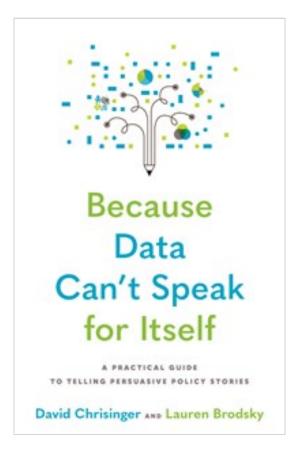

A guide for how to tell clear, data-driven stories that will make an impact.

People with important evidence-based ideas often struggle to translate data into stories their readers can relate to and understand. And if leaders can't communicate well to their audience, they will not be able to make important changes in the world.

Why do some evidence-based ideas thrive while others die? And how do we improve the chances of worthy ideas? In *Because Data Can't Speak for Itself*, accomplished educators and writers David Chrisinger and Lauren Brodsky tackle these questions head-on. They reveal the parts and functions of effective data-driven stories and explain myriad ways to turn your data dump into a narrative that can inform, persuade, and inspire action.

Chrisinger and Brodsky show that convincing data-driven stories draw their power from the same three traits, which they call *people*, *purpose*, and *persistence*. Writers need to find the real people behind the numbers and share their stories. At the same time, they need to remember their own purpose and be honest about what data says—and, just as importantly, what it does not.

Compelling and concise, this fast-paced tour of success stories—and several failures—includes examples on topics such as COVID-19, public diplomacy, and criminal justice. Chrisinger and Brodsky's easy-to-apply tool kit will turn anyone into an effective and persuasive evidence-based writer. Aimed at policy analysts, politicians, journalists, teachers, and business leaders, *Because Data Can't Speak for Itself* will transform the way you communicate ideas.

THE PRESENT ILLNESS

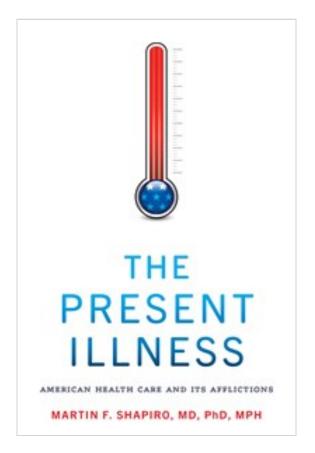

American Health Care and Its Afflictions
MARTIN F. SHAPIRO

Beyond political posturing and industry quick-fixes, why is the American health care system so difficult to reform?

Health care reform efforts are difficult to achieve and have been historically undermined by their narrow scope. In *The Present Illness*, Martin F. Shapiro, MD, PhD, MPH, weaves together history, sociology, extensive research, and his own experiences as a physician to explore the broad range of afflictions impairing US health care and explains why we won't be able to fix the system without making significant changes across society.

With a sharp eye and ready humor, Shapiro dissects the ways all groups participating—clinicians and their organizations, medical schools and their faculty, hospitals and clinical corporations, scientists and the National Institutes of Health, insurers and manufacturers, governments and their policies, and also patients and the public—shape and reinforce a dysfunctional system. Shapiro identifies three major problems stymieing reform: commodification of care; values, expectations, unmet needs, attitudes, and personal limitations of participants; and toxic relationships and communication among these groups.

Shapiro lays out a sweeping agenda of concrete actions to address the many factors contributing to the system's failings. Highlighting the interconnectedness of both the problems and potential solutions, he warns that piecemeal reform efforts will continue to be undermined by those who believe they have something to gain from the status quo. Although overhauling our health care system is daunting, Shapiro nonetheless concludes that we must push forward with a far more comprehensive effort in all sectors of health care and throughout society to create a system that is humane, effective, and just.

MODERNIZING MEDICARE

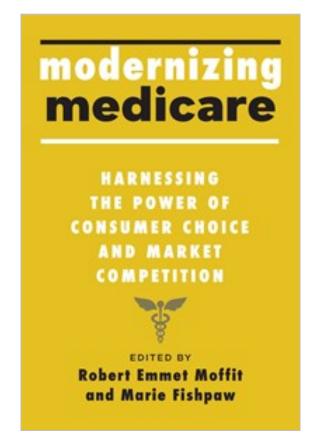

Harnessing the Power of Consumer Choice and Market Competition

EDITED BY ROBERT EMMET MOFFIT AND MARIE FISHPAW

Top policy experts offer Medicare reform solutions for the millions of seniors whose health care depends on America's fastest growing federal entitlement.

In *Modernizing Medicare*, editors Robert Emmet Moffit and Marie Fishpaw bring together a rare combination of leading scholars and policy practitioners to outline a vision for Medicare reform and provide solutions for the millions of seniors whose health care depends on it. Contributors include a former Medicare trustee, a former Medicare administrator, and a former director of the Congressional Budget Office.

Detailing Medicare's biggest problems, this team of top policy experts offer solutions based on personal freedom of choice, transparency of price and performance, and market competition among health plans and providers that will secure patients more affordable, more accountable, and higher quality medical care. They also address Medicare's reform needs and analyze the promising performance of the Medicare Advantage program. The authors outline Medicare's major financial problems and the best solutions for Medicare patients and taxpayers alike. While Medicare's accelerating spending is generating higher deficits and debt, standard cost-control strategies—such as payment reductions and price controls—jeopardize patients' access to high-quality care.

BUILDING A UNIFIED AMERICAN HEALTH CARE SYSTEM

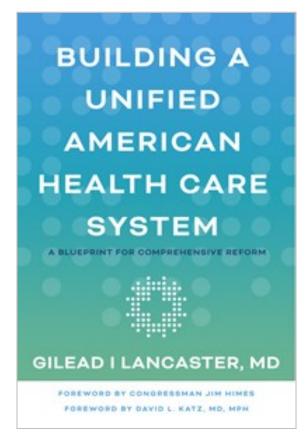

A Blueprint for Comprehensive Reform
GILEAD I LANCASTER, FOREWORD BY JIM HIMES AND DAVID L. KATZ

A blueprint for comprehensive, science-based health care system reform.

Financial and political pressures on our health care system have negatively impacted individual care and the health system as a whole—an issue that has only become more acute because of the COVID-19 pandemic. In *Building a Unified American Health Care System*, Gilead I Lancaster, MD, lays out a blueprint for comprehensive health care reform by mapping out a unified system run by health care professionals—not politicians or commercial health insurance companies—that offers universal coverage and access.

Lancaster compares the current arguments for single payer versus commercial health insurance systems with arguments in the early 1900s for a central bank versus regional commercial banks. He then introduces a novel solution: the establishment of a National Medical Board similar to the Federal Reserve System that helped fix the American banking system over a century ago. Along with other innovations, a plan co-created by Lancaster dubbed EMBRACE (Expanding Medical and Behavioral Resources with Access to Care for Everyone) would involve creating a modern, evidence-based health care system, one offering universal coverage for basic health care needs while allowing for commercial insurance participation. Emphasizing the importance of separating health care from governmental and commercial pressures and incentives, Lancaster explains the need for comprehensive—rather than incremental—reform of the American health care system.

Touching on public health, economics, history, finance, and information technology, this clear-eyed book offers a unique roadmap toward holistically transforming the entire American health care system in ways that improve care for all Americans.

BLACK HEALTH IN THE SOUTH

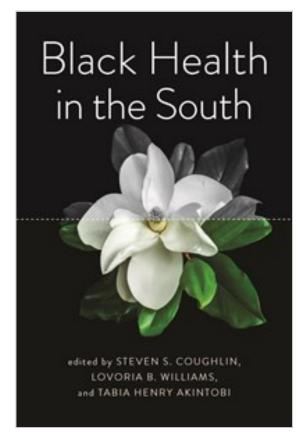

EDITED BY STEVEN S. COUGHLIN, LOVORIA B. WILLIAMS AND TABIA HENRY AKINTOBI

A collection of important essays on the health and well-being of African Americans in the southern United States.

For African Americans in the southern United States, the social determinants of health are influenced by a unique history that encompasses hundreds of years of slavery, injustices during the Jim Crow era, the Great Migration, the Civil Rights era, and contemporary experiences like the Black Lives Matter movement. In *Black Health in the South*, editors Steven S. Coughlin, Lovoria B. Williams, and Tabia Henry Akintobi bring together essays on this important subject from top public health experts.

Black activists, physicians, and communities continue to battle inequities and structural problems that include poverty, inadequate access to health care, incarceration, a lack of transportation, and food insecurity. As the result of redlining and other historical and contemporary injustices, African Americans are less likely to own a home or to have equity, which places them in danger of financial ruin if they experience an illness such as a heart attack, stroke, or cancer, for which they are often at greater risk due to many social and environmental factors. At the same time, African American communities display many strengths and are often very resilient against these structural inequities. The use of community coalitions is a valuable approach for addressing health disparities in African American communities, and improving the cultural competence of health care providers further reduces the effects of health disparities.

With essays spanning topics from culturally appropriate health care to faith-based interventions and the role of research networks in addressing disparities, this collection is pivotal for understanding the health of African Americans in the South.

WELL CONNECTED

Everyday Water Practices in Cairo

TESSA FARMER

How a community in Cairo, Egypt, has adapted the many systems required for clean water.

Who is responsible for ensuring access to clean potable water? In an urbanizing planet beset by climate change, cities are facing increasingly arid conditions and a precarious water future. In *Well Connected*, anthropologist Tessa Farmer details how one community in Cairo, Egypt, has worked collaboratively to adapt the many systems required to facilitate clean water in their homes and neighborhoods.

As a community that was originally not included in Cairo's municipal systems, the residents of Ezbet Khairallah built their own potable water and wastewater infrastructure. But when the city initiated a piped sewage removal system, local residents soon found themselves with little to no power over their own water supply or wastewater removal. Throughout this transition, residents worked together to collect water at the right times to drink, bathe, do laundry, cook, and clean homes. These everyday practices had deep implications for the health of community members, as they struggled to remain hydrated, rid their children of endemic intestinal worms, avoid consuming water contaminated with sewage, and mediate the impact of fluctuating water quality.

Farmer examines how the people of Cairo interact with one another, with the government, and with social structures in order to navigate the water systems (and lack thereof) that affect their day-to-day lives. Farmer's extensive ethnographic fieldwork during the implementation of the Governorate of Cairo's septic system shines through in the compelling stories of community members. *Well Connected* taps into the inherent sociality of water through social contacts, moral ideology, interpersonal relationships, domestic rhythms, and the everyday labor of connecting.

JUNK FOOD POLITICS

How Beverage and Fast Food Industries Are Reshaping Emerging Economies

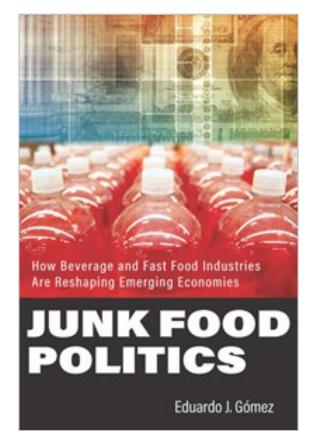

EDUARDO J. GÓMEZ

Why do sugary beverage and fast food industries thrive in the emerging world?

An interesting public health paradox has emerged in some developing nations. Despite government commitment to eradicating noncommunicable diseases and innovative prevention programs aimed at reducing obesity and type 2 diabetes, sugary beverage and fast food industries are thriving. But political leaders in countries such as Mexico, Brazil, India, China, and Indonesia are reluctant to introduce policies regulating the marketing and sale of their products, particularly among vulnerable groups like children and the poor. Why?

In *Junk Food Politics*, Eduardo J. Gómez argues that the challenge lies with the strategic politics of junk food industries in these countries. Industry leaders have succeeded in creating supportive political coalitions by, ironically, partnering with governments to promote soda taxes, food labeling, and initiatives focused on public awareness and exercise while garnering presidential support (and social popularity) through contributions to government anti-hunger and anti-poverty campaigns. These industries have also manipulated scientific research by working with academic allies while creating their own support bases among the poor through employment programs and community services. Taken together, these tactics have hampered people's ability to mobilize in support of stricter regulation for the marketing and sale of unhealthy products made by companies such as Coca-Cola, PepsiCo, and Nestlé.

Drawing on detailed historical case studies, *Junk Food Politics* proposes an alternative political science framework that emphasizes how junk food corporations restructure politics and society before agenda-setting ever takes place.

SUBATOMIC WRITING

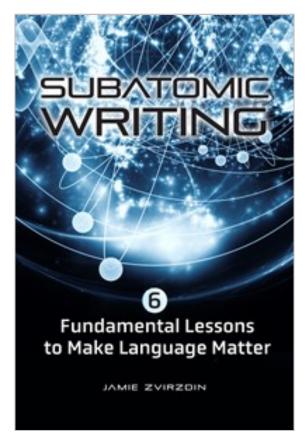

Six Fundamental Lessons to Make Language Matter JAMIE ZVIRZDIN

See science writing fundamentals afresh through a subatomic lens!

In *Subatomic Writing*, Johns Hopkins University instructor Jamie Zvirzdin goes bravely into uncharted territory by offering a totally new kind of guide for writing about science—from the subatomic level up! *Subatomic Writing* teaches readers that the building blocks of language are like particles in physics. These particles, combined and arranged, form something greater than their parts: all matter in the literary universe. The six levels of language covered in this guide create writing that illuminates and energizes the reader to feel, learn, change, and act. This interdisciplinary approach helps scientists, science writers, and editors improve their writing in fundamental areas as they build from the sounds in a word to the pacing of a paragraph. These areas include

- Sound and sense
- Word classes
- Grammar and syntax
- Punctuation
- Rhythm and emphasis
- Pacing and coherence

Equally helpful for students who need to learn how to write clearly about science and scientists who need to hone their writing skills to create more effective course material, papers, and grant applications, this guide builds confidence in writing abilities as old skills are taught in new, exciting ways. Each lesson provides exercises that build on each other, strengthening readers' capacity to communicate ideas and data, all while learning basic particle physics along the way.

PERSONALITY DISORDERS

A Short History of Narcissistic, Borderline, Antisocial, and Other Types

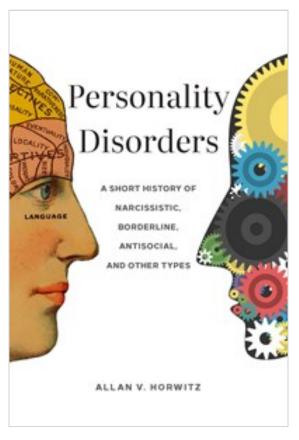

ALLAN V. HORWITZ

The fascinating and controversial history of personality disorders.

The concept of personality disorders rose to prominence in the early twentieth century and has consistently caused controversy among psychiatrists, psychologists, and social scientists. In *Personality Disorders*, Allan V. Horwitz traces the evolution of defining these disorders and the historical dilemmas of attempting to mold them into traditional medical conceptions of disorder.

Using the *Diagnostic and Statistical Manual of Mental Disorders, or DSM*, as a guide, Horwitz explores the group of conditions that make up personality disorders and considers when they have been tied to or separated from other types of mental illnesses. He also examines how these disorders have often entailed negative moral and cultural evaluations more focused on perceived social deviance than on actual medical conditions.

Deep conflicts exist in a variety of disciplines in determining the nature of these disorders. During the twentieth century, a particularly sharp division arose between researchers who study personality disorders and the clinicians who treat them. Because researchers strive to develop general laws and clinicians attempt to understand individuals' specific problems, their values, methods, and goals often conflict. Synthesizing historical and contemporary scholarship, Horwitz examines controversies over the definitions and diagnoses of personality disorders and how the perception of these illnesses has changed over time.

THE BRAVE NEW WORLD

A History of Early America
PETER CHARLES HOFFER

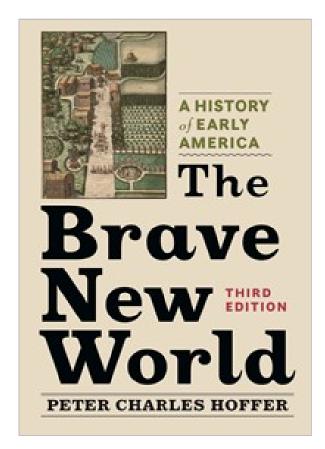

A lively synthesis of early American history, now in its third edition.

The Brave New World covers the entire span of early American history, from 30,000 years before Europeans landed on North American shores to the Revolutionary War. With its exploration of the places and peoples of early America, this comprehensive new edition of a classic textbook brings together the most recent scholarship on the colonial and revolutionary eras, Native Americans, slavery and the slave trade, politics, war, and the daily lives of ordinary people.

In this edition, Peter Charles Hoffer incorporates the wealth of innovative work on early American history, including fresh material on

- environmental history
- the Dutch and French Caribbean
- Indigenous societies
- consumer goods
- mapping
- captivity tales
- settler imperialism
- power—who has it, who wants it, how it is expressed, and how it is opposed

Emphasizing how diverse and entangled the early American imperial world was, this edition also greatly expands the geographical scope of the book. An updated bibliographic essay offering short descriptions of relevant books, articles, collections, and anthologies rounds out the volume. Wide-ranging and inclusive, *The Brave New World* continues to provide students, instructors, and historians with an engaging and accessible history of early North America.

GRASSROOTS LEVIATHAN

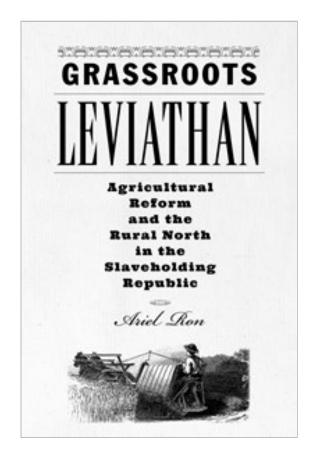

Agricultural Reform and the Rural North in the Slaveholding Republic

ARIEL RON

How a massive agricultural reform movement led by northern farmers before the Civil War recast Americans' relationships to market forces and the state.

Recipient of The Center for Civil War Research's 2021 Wiley-Silver Book Prize, Winner of the Theodore Saloutos Memorial Award by the Agricultural History Society

In this sweeping look at rural society from the American Revolution to the Civil War, Ariel Ron argues that agricultural history is central to understanding the nation's formative period. Upending the myth that the Civil War pitted an industrial North against an agrarian South, *Grassroots Leviathan* traces the rise of a powerful agricultural reform movement spurred by northern farmers. Ron shows that farming dominated the lives of most Americans through almost the entire nineteenth century and traces how middle-class farmers in the "Greater Northeast" built a movement of semipublic agricultural societies, fairs, and periodicals that fundamentally recast Americans' relationship to market forces and the state.

SAVING THE WORLD FROM NUCLEAR WAR

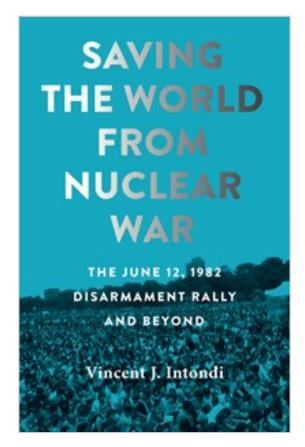

The June 12, 1982, Disarmament Rally and Beyond VINCENT J. INTONDI

Examines how the June 12, 1982, rally for nuclear disarmament paved the way for a new generation of activists.

On June 12, 1982, one million people filled the streets of New York City and rallied in Central Park to show support for the United Nations' Second Special Session on Disarmament. They demanded an end to the nuclear arms race and called for a shift from military funds to money allocated for human needs. In *Saving the World from Nuclear War*, Vincent Intondi explores this demonstration from its inception through the months of organizing, recruiting, and planning, to the historic day itself. Movement leaders were forced to confront the Reagan administration, ideological differences, racism, homophobia, and misogyny to pull off what became the largest peace demonstration in US history.

While nuclear disarmament has been typically viewed as a white, middle-class issue, Intondi shows that the nuclear disarmament movement was much more diverse than previously thought. Groups representing African Americans, women, and the LGBTQ community were all active during this period, and among the main organizers of the June 12 demonstration.

Drawing on archival materials and interviews with rally organizers and activists in Central Park that day, Intondi takes the reader on a journey through the height of the Cold War and shows how a million people came together to demand an end to the arms race. Although the threat of nuclear war remains today, this historic rally contributed to the Reagan administration changing course on nuclear weapons and paved the way for a new generation of activists committed to saving the world from nuclear annihilation.

THE SPINGARN BROTHERS

White Privilege, Jewish Heritage, and the Struggle for Racial Equality

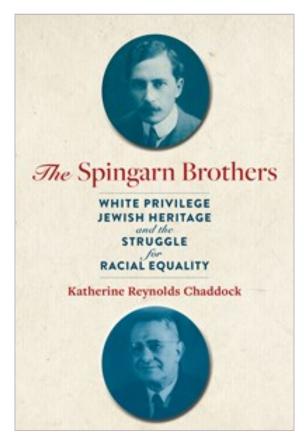

KATHERINE REYNOLDS CHADDOCK

An absorbing account of how two Jewish brothers devoted themselves to the struggle for racial equality in the United States.

In the late nineteenth century, Joel and Arthur Spingarn grew up in New York City as brothers with very different personalities, interests, and professional goals. Joel was impetuous and high-spirited; Arthur was reasoned and studious. Yet together they would become essential leaders in the struggle for racial justice and equality, serving as presidents of the National Association for the Advancement of Colored People, exposing inequities, overseeing key court cases, and lobbying presidents from Theodore Roosevelt to John F. Kennedy.

In *The Spingarn Brothers*, Katherine Reynolds Chaddock sheds new light on the story of these fascinating brothers and explores how their Jewish heritage and experience as second-generation immigrants led to their fight for racial equality. Upon graduating from Columbia University, Arthur joined a top Manhattan law practice, while Joel became a professor of comparative literature. The two soon witnessed growing racial injustices in the city and joined the NAACP in 1909, its founding year. Arthur began to aim his legal practice toward issues of discrimination, while Joel founded the NAACP's New York City branch.

Drawing from personal letters, journals, and archives, Chaddock uncovers some of the motivations and influences that guided the Spingarns. Both brothers served in World War I, married, and pursued numerous interests that ranged from running for Congress to collecting rare books and manuscripts by Black authors around the world. In this dual biography, Chaddock illustrates how the Spingarn brothers' unique personalities, Jewish heritage, and family history shaped their personal and professional lives into an ongoing fight for racial justice.

AMERICAN KAIROS

Washington National Cathedral and the New Civil Religion

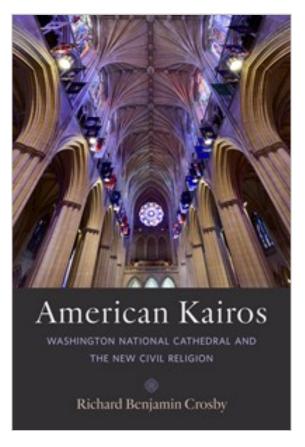

RICHARD BENJAMIN CROSBY

A history of Washington National Cathedral and the theory of an American civil religion.

In 1792, Pierre Charles L'Enfant, the first city planner of Washington, DC, introduced the idea of a "great church for national purposes." Unlike L'Enfant's plans for the White House, the US Capitol, and the National Mall, this grand temple to the republic never materialized. But in 1890, the Episcopal Church began planning what is known today as Washington National Cathedral.

In American Kairos, Richard Benjamin Crosby chronicles the history of not only the building but also the idea that animates it, arguing that the cathedral is a touchstone site for the American civil religion—the idea that the United States functions much like a religion, with its own rituals, sacred texts, holy days, and so on. He shows that the National Cathedral can never be the church L'Enfant envisioned, but it can be a starting point for studying the conflicts of belonging, ideology, and America's place in the world that define the American civil religion. By examining correspondence between L'Enfant, George Washington, Thomas Jefferson, and others, and by diving into Washington National Cathedral's archives, Crosby uncovers a crucial gap in the formation of the nation's soul.

While L'Enfant's original vision was never realized, Washington National Cathedral reminds us that perhaps it can be. The cathedral is one of the great rhetorical and architectural triumphs in the history of American religion. Without government mandate or public vote, it has claimed its role as America's de facto house of worship, a civil religious temple wherein Americans conduct some of their highest, holiest rituals, including state funerals and National Day of Prayer services.

LAZARETTO

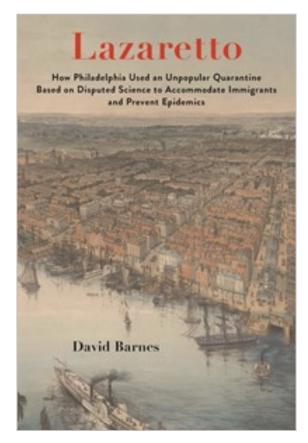

How Philadelphia Used an Unpopular Quarantine Based on Disputed Science to Accommodate Immigrants and Prevent Epidemics

DAVID S. BARNES

How the controversial practice of quarantine saved nineteenth-century Philadelphia after a series of deadly epidemics.

In the 1790s, four devastating yellow fever epidemics threatened the survival of Philadelphia, the nation's capital and largest city. In response, the city built a new quarantine station called the Lazaretto downriver from its port. From 1801 to 1895, a strict quarantine was enforced there to protect the city against yellow fever, cholera, typhus, and other diseases. At the time, the science behind quarantine was hotly contested, and the Board of Health in Philadelphia was plagued by internal conflicts and political resistance. In *Lazaretto*, David Barnes tells the story of how a blend of pragmatism, improvisation, and humane care succeeded in treating seemingly incurable diseases and preventing further outbreaks.

Barnes shares the lessons of the Lazaretto through a series of tragic and inspiring true stories of people caught up in the painful ordeal of quarantine. They include a nine-year-old girl enslaved in West Africa and freed upon arrival in Philadelphia, an eleven-year-old orphan boy who survived yellow fever only to be scapegoated for starting an epidemic, and a grieving widow who saved the Lazaretto in the midst of catastrophe. Spanning a turbulent century of immigration, urban growth, and social transformation, *Lazaretto* takes readers inside the life-and-death debates and ordinary heroism that saved Philadelphia when its survival as a city was at stake. Amid the controversy and tragedy of the COVID-19 pandemic, this surprising reappraisal of America's historic struggle against deadly epidemics reminds us not to neglect old knowledge and skills in our rush to embrace the new.

MAKING MACHINES OF ANIMALS

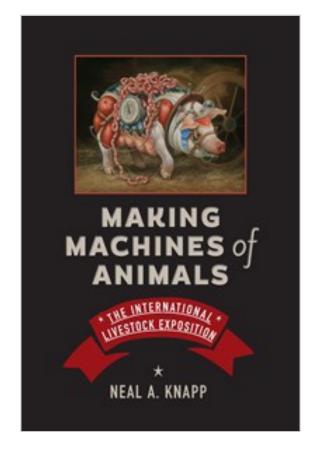

The International Livestock Exposition NEAL A. KNAPP

How the Chicago International Livestock Exposition leveraged the eugenics movement to transform animals into machines and industrialize American agriculture.

In 1900, the Chicago International Livestock Exposition became the epicenter of agricultural reform that focused on reinventing animals' bodies to fit a modern, industrial design. Chicago meatpackers partnered with land-grant university professors to create the International—a spectacle on the scale of a world's fair —with the intention of setting the standard for animal quality and, in doing so, transformed American agriculture.

In *Making Machines of Animals*, Neal A. Knapp explains the motivations of both the meatpackers and the professors, describing how they deployed the International to redefine animality itself. Both professors and packers hoped to replace so-called scrub livestock with "improved" animals and created a new taxonomy of animal quality based on the burgeoning eugenics movement. The International created novel definitions of animal superiority and codified new norms, resulting in a dramatic shift in animal weight, body size, and market age. These changes transformed the animals from multipurpose to single-purpose products. These standardized animals and their dependence on off-the-farm inputs and exchanges limited farmer choices regarding husbandry and marketing, ultimately undermining any goals for balanced farming or the maintenance and regeneration of soil fertility.

Drawing on land-grant university research and publications, meatpacker records and propaganda, and newspaper and agricultural journal articles, Knapp critiques the supposed market-oriented, efficiency-driven industrial reforms proffered by the International, which were underpinned by irrational, racist ideologies.

REPLAYED

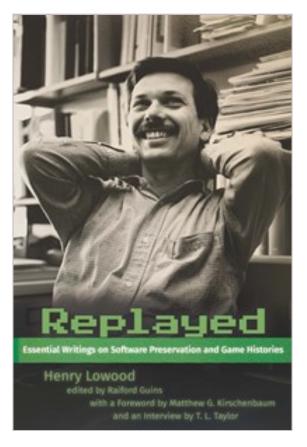

Essential Writings on Software Preservation and Game Histories

HENRY LOWOOD, EDITED BY RAIFORD GUINS, FOREWORD BY MATTHEW G. KIRSCHENBAUM

A leading voice in technology studies shares a collection of essential essays on the preservation of software and history of games.

Since the early 2000s, Henry E. Lowood has led or had a key role in numerous initiatives devoted to the preservation and documentation of virtual worlds, digital games, and interactive simulations, establishing himself as a major scholar in the field of game studies. His voluminous writings have tackled subject matter spanning the history of game design and development, military simulation, tabletop games, machinima, e-sports, wargaming, and historical software archives and collection development. *Replayed* consolidates Lowood's far-flung and significant publications on these subjects into a single volume.

Lowood offers important historical contexts for digital and analog game objects and their implications for both documentation and preservation. *Replayed* is divided into three sections focused on archives, documentation, and the preservation of historical software, game histories and historiography, and future directions. The volume includes two previously unpublished essays, along with Lowood's reflective section introductions that provide a contemporary take on his previously published works. Rounding out the book are a foreword by Matthew G. Kirschenbaum detailing Lowood's sustained commitment to games, an introduction by editor Raiford Guins sharing Lowood's scholarly and curatorial pursuits, and an extensive interview with Lowood on his personal and professional background conducted by T. L. Taylor. For those interested in the history of technology, game studies, libraries, archives, and museums, *Replayed* presents the opportunity to read Lowood's works—writing that remains timely, skillfully executed, and rigorously researched—as a major project chronicling the history of games.

LAND AND LIBERTY

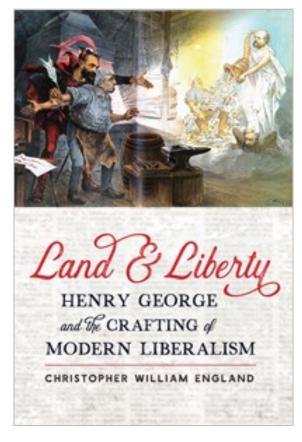

Henry George and the Crafting of Modern Liberalism CHRISTOPHER WILLIAM ENGLAND

A comprehensive history of Henry George and the single tax movement.

In 1912, Sun Yat-sen announced the birth of the Chinese Republic and promised that it would be devoted to the economic welfare of all its people. In shaping his plans for wealth redistribution, he looked to an American now largely forgotten in the United States: Henry George. In *Land and Liberty*, Christopher William England excavates the lost history of one of America's most influential radicals and explains why so many activists were once inspired by his proposal to tax landed wealth.

Drawing on the private papers of a network of devoted believers, Land and Liberty represents the first comprehensive account of this important movement to nationalize land and expropriate rent. Beginning with concerns about rising rents in the 1870s and ending with the establishment of New Deal policies that extended public control over land, natural resources, and housing, "Georgism" served as a catalyst for reforms intended to make the nation more democratic. Many of these concerns remain relevant today, including the exploitation of natural resources, rising urban rent, and wealth inequality.

At a time when class divisions sparked fears that capitalism and democracy were incompatible, hopes of building a social welfare state using the rents of idle landlords revitalized the middle class's conviction that democracy and liberty could be reconciled. Against steep odds, George made land nationalization vital to the politics of a nation dominated by small farmers and helped push liberalism leftward through his calls for collective rights to land and natural resources.

THE INTERLOPERS

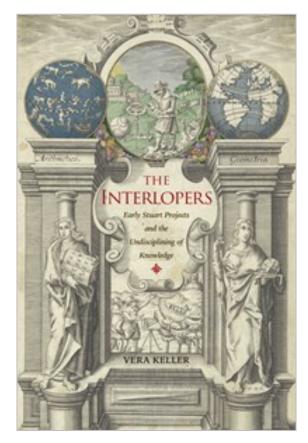

Early Stuart Projects and the Undisciplining of Knowledge VERA KELLER

A reframing of how scientific knowledge was produced in the early modern world.

Many accounts of the scientific revolution portray it as a time when scientists disciplined knowledge by first disciplining their own behavior. According to these views, scientists such as Francis Bacon produced certain knowledge by pacifying their emotions and concentrating on method. In *The Interlopers*, Vera Keller rejects this emphasis on discipline and instead argues that what distinguished early modernity was a navigation away from restraint and toward the violent blending of knowledge from across society and around the globe.

Keller follows early seventeenth-century English "projectors" as they traversed the world, pursuing outrageous entrepreneurial schemes along the way. These interlopers were developing a different culture of knowledge, one that aimed to take advantage of the disorder created by the rise of science and technological advances. They sought to deploy the first submarine in the Indian Ocean, raise silkworms in Virginia, and establish the English slave trade. These projectors developed a culture of extreme risk-taking, uniting global capitalism with martial values of violent conquest. They saw the world as a riskscape of empty spaces, disposable people, and unlimited resources.

By analyzing the disasters—as well as a few successes—of the interlopers she studies, Keller offers a new interpretation of the nature of early modern knowledge itself. While many influential accounts of the period characterize European modernity as a disciplining or civilizing process, *The Interlopers* argues that early modernity instead entailed a great undisciplining that entangled capitalism, colonialism, and science.

THE MAKER OF PEDIGREES

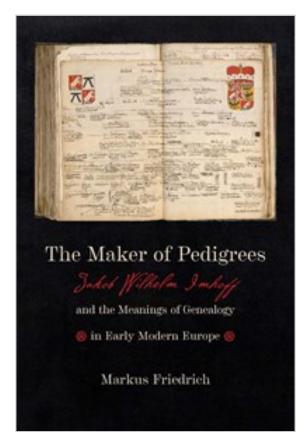

Jakob Wilhelm Imhoff and the Meanings of Genealogy in Early Modern Europe

MARKUS FRIEDRICH

A history of genealogical knowledge-making strategies in the early modern world.

In *The Maker of Pedigrees*, Markus Friedrich explores the complex and fascinating world of central European genealogy practices during the Baroque era. Drawing on archival material from a dozen European institutions, Friedrich reconstructs how knowledge about noble families was created, authenticated, circulated, and published. Jakob Wilhelm Imhoff, a wealthy and well-connected patrician from Nuremberg, built a European community of genealogists by assembling a transnational network of cooperators and informants. Friedrich uses Imhoff as a case study in how knowledge was produced and disseminated during the 17th and 18th centuries.

Family lineages were key instruments in defining dynasties, organizing international relations, and structuring social life. Yet in the early modern world, knowledge about genealogy was cumbersome to acquire, difficult to authenticate, and complex to publish. Genealogy's status as a source of power and identity became even more ambivalent as the 17th century wore on, as the field continued to fragment into a plurality of increasingly contradictory formats and approaches. Genealogy became a contested body of knowledge, as a heterogeneous set of actors—including aristocrats, antiquaries, and publishers—competed for authority. Imhoff was closely connected to all of the major genealogical cultures of his time, and he serves as a useful prism through which the complex field of genealogy can be studied in its bewildering richness.

A CENTAUR IN LONDON

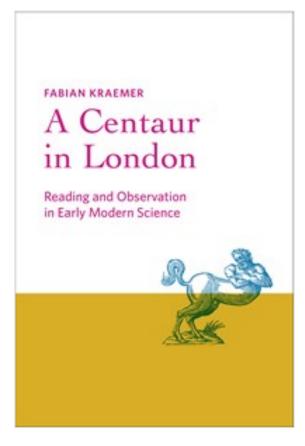

Reading and Observation in Early Modern Science FABIAN KRAEMER

A nuanced reframing of the dual importance of reading and observation for early modern naturalists.

Historians of science traditionally argue that the sciences were born in early modern Europe during the so-called scientific revolution. At the heart of this narrative lays a supposed shift from the knowledge of books to the knowledge of things. The attitude of the new-style intellectual broke with the text-based practices of erudition and instead cultivated the new empiricism of observation and experiment. Instead of blindly trusting the authority of ancient sources such as Pliny and Aristotle, practitioners of the new experimental philosophy insisted upon experiential proof.

In A Centaur in London, Fabian Kraemer calls a key tenet of this master narrative into question—that the rise of empiricism entailed a decrease in the importance of reading practices. Kraemer shows instead that the early practices of textual erudition and observational empiricism were by no means so remote from one another as the traditional narrative would suggest. Kraemer argues that reading books and reading the book of nature had a great deal in common—indeed, that reading texts was its own kind of observation. Especially in the case of rare and unusual phenomena like monsters, naturalists were dependent on the written reports of others who had experienced the good luck to be at the right place at the right time. The connections between compiling examples from texts and from observation were especially close in such cases.

A Centaur in London combines the history of scholarly reading with the history of scientific observation to argue for the sustained importance of both throughout the Renaissance and provides a nuanced, textured portrait of early modern naturalists at work.

SACRED ENGAGEMENTS

Interfaith Marriage, Religious Toleration, and the British Novel, 1750–1820

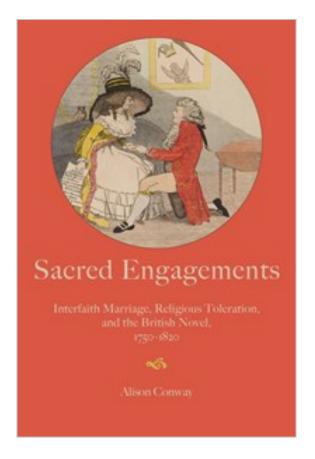

ALISON CONWAY

A revelatory reading of the British novel that considers interfaith marriage, religious toleration, and the ethics of sociability.

Bringing together feminist theory, novel criticism, and religious studies, Alison Conway's *Sacred Engagements* advances a postsecular reading of the novel that links religious tolerance and the eighteenth-century marriage plot. Conway explores the historical roots of the vexed questions that interfaith marriage continues to raise today. She argues that narrative wields the power to imagine conjugal and religious relations that support the embodied politics crucial to a communal, rather than state-sponsored, ethics of toleration.

Conway studies the communal and gendered aspects of religious experience embedded in Samuel Richardson's account of interfaith marriage and liberalism's understandings of toleration in *Sir Charles Grandison*. In her readings of Frances Brooke, Elizabeth Inchbald, and Maria Edgeworth, Conway considers how women authors reframe the questions posed by *Grandison*, representing intimacy, authorship, and women's religious subjectivity in ways that challenge the social and political norms of Protestant British culture. She concludes with reflections on Jane Austen's *Mansfield Park* and the costs of a marriage plot that insists on religious conformity.

By examining the complex epistemologies of the interfaith marriage plot, *Sacred Engagements* counters the secularization thesis that has long dominated eighteenth-century novel studies. In so doing, the book recognizes those subjects otherwise ignored by liberal political theory and extrapolates how a genuinely inclusive tolerance might be imagined in our own deeply divided times.

DORIAN UNBOUND

Transnational Decadence and the Wilde Archive SEAN O'TOOLE

A bold reimagining of the literary history of Decadence through a close examination of the transnational contexts of Oscar Wilde's classic novel *The Picture of Dorian Gray*.

Building upon a large body of archival and critical work on Oscar Wilde's only novel, *Dorian Unbound* offers a new account of the importance of transnational contexts in the forging of Wilde's imagination and the wider genealogy of literary Decadence. Sean O'Toole argues that the attention critics have rightly paid to Wilde's backgrounds in Victorian Aestheticism and French Decadence has had the unintended effect of obscuring a much broader network of transnational contexts. Attention to these contexts allows us to reconsider how we read *The Picture of Dorian Gray*, what we believe we know about Wilde, and how we understand literary Decadence as both a persistent, highly mobile cultural mode and a precursor to global modernism.

In developing a transnational framework for reading *Dorian Gray*, O'Toole recovers a subterranean network of nineteenth-century cultural movements. At the same time, he joins several active and vital conversations about what it might mean to expand the geographical reach of Victorian studies and to trace the globalization of literature over a longer period of time. *Dorian Unbound* includes chapters on the Irish Gothic, German historical romance, US magic-picture tradition, and experimental English epigrams, as well as a detailed history and a new close reading of the novel, in an effort to understand Wilde's contribution to a more dynamic idea of Decadence than has been previously known.

From its rigorous account of the broad archive of texts that Wilde read and the array of cultural movements from which he drew inspiration in writing *Dorian Gray* to the novel's afterlives and global resonances.

THE ORDERED DAY

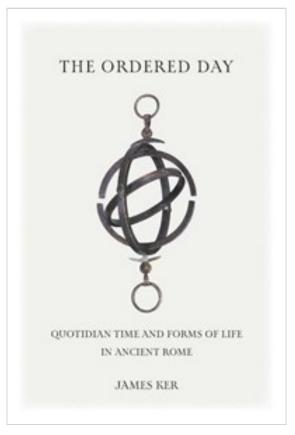

Quotidian Time and Forms of Life in Ancient Rome JAMES KER

Traces how the day has served as a key organizing concept in Roman culture—and beyond.

How did ancient Romans keep track of time? What constituted a day in ancient Rome was not the same twenty-four hours we know today. In *The Ordered Day,* James Ker traces how the day served as a key organizing concept, both in antiquity and in modern receptions of ancient Rome.

Romans used the story of how the day emerged as a unit of sociocultural time to give order to their own civic and imperial history. Ancient literary descriptions of people's daily routines articulated distinctive forms of life within the social order. And in the imperial period and beyond, outsiders—such as early Christians in their monastic rules and modern antiquarians in books on daily life—ordered their knowledge of Roman life through reworking the day as a heuristic framework.

Scholarly interest in Roman time has recently moved from the larger unit of the year and calendar to smaller units of time, especially in the study of sundials and other timekeeping technologies of the ancient Mediterranean. Through extensive analysis of ancient literary texts and material culture as well as modern daily life handbooks, Ker demonstrates the privileged role that "small time" played, and continues to play, in Roman literary and cultural history. Ker argues that the ordering of the day provided the basis for the organizing of history, society, and modern knowledge about ancient Rome. For readers curious about daily life in ancient Rome as well as for students and scholars of Roman history and Latin literature, *The Ordered Day* provides an accessible and fascinating account of the makings of the Roman day and its relationship to modern time structures.

STUDIES IN EIGHTEENTH-CENTURY CULTURE

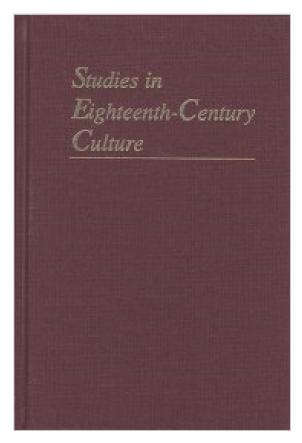

EDITED BY DAVID A. BREWER AND CRYSTAL B. LAKE

The latest work in eighteenth-century studies.

Showcasing exciting new research across disciplines, Volume 52 of *Studies in Eighteenth-Century Culture* explores how history's dominant narratives have been challenged and reframed.

Anne Lafont shows how early writings about Black art questioned the cultural negation of enslaved peoples' humanity. A cluster of essays on "Decolonizing Eighteenth-Century Studies" connects the current conditions under which we produce scholarship to the forms of exploitation that defined the eighteenth century. Erica Johnson Edwards chronicles how self-liberated people in colonial Haiti resisted their recapture by using advertisements for unclaimed runaways, while Allison Cardon argues that Ottobah Cugoano's critiques of abolitionist discourse were more radical than we have recognized. Another cluster recenters Native epistemologies in the interactions between Indigenous Peoples and settlers in the American South.

Alison DeSimone compares love songs to didactic and erotic literature. Carolina Blutrach recovers the contributions that diplomats' spouses made to cultural life, while Jolene Zigarovich unearths evidence of women who transmitted property to other women. Two clusters focus on the "Female Wunderkind in the Eighteenth Century" and "Biography and the Woman Writer Revisited." Jeffrey Ravel investigates the use of playing cards in the French Revolution, while Christopher Hendricks recovers the history of the jumbal, a proto-cookie. A collaboratively written essay explores the movements of four commodities through the global supply chain. Mattie Burkert focuses on the invisible labor of women. Volume 52 concludes with a cluster on Oliver Goldsmith's "The Deserted Village" that studies the poem's acoustics, history of illustration, and intertextual resonance.

FEELING LIKE A KID Childhood and Children's Literature JERRY GRISWOLD

A lively and illustrated inquiry of how children's literature reflects the curious mind of a child—now available in paperback.

Outstanding Academic Title for 2007, Choice Magazine

In this engaging book, Jerry Griswold examines the unique qualities of childhood experience and their reappearance as frequent themes in children's literature. Surveying dozens of classic and popular works for the young—from *Heidi* and *The Wizard of Oz* to Beatrix Potter and *Harry Potter*—Griswold demonstrates how great children's writers succeed because of their uncanny ability to remember what it feels like to be a kid: playing under tables, shivering in bed on a scary night, arranging miniature worlds with toys, zooming around as caped superheroes, and listening to dolls talk.

Feeling Like a Kid boldly and honestly identifies the ways in which the young think and see the world in a manner different from that of adults. Written by a leading scholar, prize-winning author, and frequent contributor to the Los Angeles Times, this extensively illustrated book will fascinate general readers as well as all those who study childhood and children's literature.
