## The Practitioner's Guide to Mirroring Hands

A client-responsive therapy that facilitates natural problem-solving and mind-body healing

Richard Hill and Ernest L. Rossi

Describes in detail how Mirroring Hands is conducted, and explores the framework of knowledge and understanding that surrounds and supports its therapeutic process.

Foreword by Jeffrey K. Zeig.

Mirroring Hands is a practical therapeutic technique that can be utilised by all practitioners for the benefit of their clients. With a tranquil state of focused attention as the starting point, the practitioner invites the client to explore an issue by projecting it into their hands; with one hand representing the difficulty or disturbance, the other becomes the natural container for the opposite reflections – resolution, ease and comfort. This enables the client to engage with their deeper therapeutic self and connect to the natural flow, cycles and self-organising emergence that shift the client toward beneficial change.

## The Art of Hypnosis – Third Edition Mastering basic techniques C. Roy Hunter

This updated third edition includes a new introduction by Conrad Adams together with a revised first chapter.

Roy Hunter is an expert in the field of hypnosis. He was specially selected to carry on the work of the 'Grand Master of Hypnotherapy', the late Charles Tebbetts, who was a master teacher of the art/science of hypnosis and hypnotherapy. This book is based upon the training courses of Tebbetts, which have been updated by Roy Hunter. Tebbetts' training has formed the basis of a large number of hypnotherapy courses taught both in America and Europe.

*The Art of Hypnosis* is well-written and easy to read and understand, even for the novice. In-depth and practical information is given on how to achieve maximum results in a hypnotic session by phrasing suggestions properly and by using various techniques to determine which approach is best for each individual client.

C. Roy Hunter teaches professional hypnosis and advanced techniques for professionals and teaches self-hypnosis to groups and clients for personal or professional motivation. He was specially selected to carry on the work of the late Charles Tebbetts.

Charismatic and possessing a profound ability to bring out the best in people, **Tad James** is a staunch believer in the inexhaustible inner potential of human beings. He is an exciting, dynamic transformational seminar leader, and a pioneer in the field of NLP.

## Hypnosis

### A comprehensive guide

Tad James with  
Lorraine Flores and  
Jack Schober

Research shows that many people react differently to different types of hypnotic induction – yet many hypnotherapists are confined to using only one technique.

This practical book makes three radically different types of hypnosis easy to use in daily hypnotic work, exploring the methods of Milton H. Erickson, George Estabrooks and David Elman, presenting them in such a way as to allow a clear and accessible understanding. A resource for all students, trainers and therapists, it includes a range of powerful scripts for improved hypnotic work.

An excellent introductory text for students beginning to study the art and science of hypnosis. For those already knowledgeable about hypnosis, there are many nuances that will enable you to increase the elegance of your work.

## Generative Trance

### The experience of creative flow

#### Stephen Gilligan

Offers a framework for developing a more creative consciousness and lays out the step-by-step processes by which this can be done.

In *Generative Trance* renowned trainer Stephen Gilligan shows you how to harness the relationship between the unconscious and the conscious mind for a much more powerful and effective therapeutic intervention, and reveals how life can be lived as a great journey of consciousness.

Emphasising that reality and identity are constructed by ourselves, Gilligan explains how generative trance is crucial in creating new realities and possibilities for clients. It is a view that differs markedly from the traditional hypnosis ideas of a client losing control, as well as from Ericksonian approaches that feature a benevolent hypnotist who bypasses the conscious mind to work with a client's unconscious mind. Instead, generative trance stresses a 'disciplined flow' process in which a person's conscious and unconscious minds cooperate to weave a higher consciousness capable of transformational change.

Stephen Gilligan has become a leading figure in Ericksonian hypnotherapy. He is the developer of the Generative Self approach to personal growth. A licensed psychologist, Stephen maintains a private practice in Encinitas, California.

## Ericksonian Approaches – Second Edition

A comprehensive manual

Rubin Battino and  
Thomas L. South

The most comprehensive manual on Ericksonian hypnotherapy yet published.

It is a thoroughly practical resource that assumes no previous knowledge of the field and develops the reader's understanding. It is filled with common sense and uncommon sense, with atmosphere and sunshine, with metaphors for more individual growth, with practice exercises for the present and with thoughts for the future.'

A CD of exercises is also available, ISBN 978-184590029-8.

# 101 Things I Wish I'd Known When I Started Using Hypnosis

Dabney M. Ewin

This simple but immensely powerful book is a testament to all the ideas that Dabney Ewin wished he had known about when he first starting practising hypnosis.

He has sought to make this publication as little as possible, consistent with the message of seeking to take a complicated idea and presenting it in the simplest way.

The words and phrases are designed to give any beginning or experienced student a foundation about the working of hypnosis. Divided into five sections, along with a comprehensive reference section for further reading, this book can be taken one page at a time from the beginning or browsed through randomly.

The US version of this title has a different cover.

**Dabney Ewin** is a Clinical Professor of Surgery and Psychiatry at Tulane University Medical School in New Orleans, Louisiana. An adjunct Faculty member and practising physician, Dabney has taught hypnosis at Tulane since 1970. He is also Clinical Professor of Psychiatry at Louisiana State University Medical School.
