In an increasingly secular, materialistic and individualistic age, the argument is put Judeo-Christianity is of little, if any, significance or relevance. In Western societies like Australia, Judeo-Christianity, for all its sins, underpins and safeguards our political and legal systems and contributes much in areas like health, education, welfare, literature, music and the arts.

Christianity Matters is a vital read for anyone interested in religion, Christianity, and who wants to know more about the challenges and threats faced by religion in Australia and Western societies today. Through this collection of essays, readers will gain a better understating of the sins and failures of the Church and how Christianity offers the road to human flourishing and inner peace and spiritual fulfilment.

Great books from the people you can trust
WILKINSON PUBLISHING

In *Boys Should Be Boys*, paediatrician and bestselling author Meg Meeker M.D. helps parents restore the delights of boyhood and enable today's boys to become the mature, confident and thoughtful men of tomorrow. Boys will always be boys—rambunctious, adventurous, and curious, climbing trees, playing footy, and pushing their growing bodies to the limit as part of the rite of passage into manhood. But today our sons face an increasingly hostile world that doesn't value the high-spirited, magical nature of boys. In a collective call to let our boys be boys, Dr. Meeker explores the secrets to boyhood, including: * Why rules and boundaries are crucial—and why boys feel lost without them * How the outdoors is still the best playground, offering the sense of adventure that only Mother Nature can provide * The essential ways to preserve a boy's innocence (and help him grow up) * The pitfalls parents face when talking to their sons * Why moody and rebellious boys are not normal—and how to address such behaviour.

Our Flying Aces

Idriess Ion

With the success of *The Desert Column* in 1932, Idriess wrote this series of mini-biographies on Australia's World War One Flying aces - John Duigan, Harry Cobby, Ross Smith, Oswald Watt, Gordon Taylor, Frank McNamara - our first V.C. aviator, and the post war acrobatics of Macintosh and Paper. Introducing the lot with a background piece on Lawrence Hargraves, Idriess shows how innovative our early airmen were, and details acts of bravado and downright lunacy in these earliest machines. Fully illustrated, and glows with his unique style.

Put Down at Birth

PUT DOWN AT BIRTH
Sandra Darroch

Growing Up on Sydney's North Shore

Darroch Sandra J.

Sydney's North Shore was – and still largely is - a very special place. It is a unique subset of Sydney's wider Australian community...a separate civilisation almost, with its own habits, beliefs, and peculiar ways. Sandra Darroch (nee Jobson) was born and grew up there and was privileged to be familiar with its atmosphere and culture (both high and low). So *PUT DOWN AT BIRTH* is a native's expose of Sydney's North Shore. It is not a history book, nor is it a Politically Correct tome. Instead, it gives an insider's view of what is still a little world unto itself. A reporter by both profession and inclination (she was the first female general reporter at the Sydney Morning Herald), Sandra looks back at the North Shore she grew up in and knew so well. She exposes the strengths and frailties which made this leafy enclave, even today, rather more genteel than the raffish other parts of Sydney. Strictly speaking, the genuine North Shore, which begins at Roseville and peters out around Pearce's Corner, Wahroonga, must be treated separately from the more general 'North Side' of Sydney.

Bony at Bermagui

Upfield Arthur

Arthur Upfield's Aboriginal detective Bony features in 29 novels, and this book holds a "lost" Bony story - angling off Bermagui, along with several rarely seen Upfield pieces on Big Game Fishing in Australian, hunting for Marlin and Swordfish, as well as a memory piece on Bermagui - where he fished very successfully in the 1930s, and where he lived in the 1950s - and wrote *The Mystery of Swordfish Reef*. Illustrated with unseen photographs from the Upfield family album, this is almost as satisfying as catching fish!

Errol Flynn

The Illustrated Life Chronology

By Florczak Robert

Though there have been myriad books on Errol Flynn - scores of biographies, film studies, analyses, etc. - there has never been one that unfurls his dashing life day-by-day, predominantly through photos, letters, news clippings, and documents.

This book does so: from Flynn's birth in Hobart, Australia in 1909 through to his death in Vancouver, Canada in 1959.

Culled from over 11,000 images in the author's personal collection (many rarely or never published), from the author's own travels around the world to photograph locations key to Flynn's life, and with text gathered from four years research in the Warner Bros.

Archives, the USC Cinematic Arts Library, and the Margaret Herrick Library, the proposed volume would be an 8 1/2 x 11" coffee table book with a projected length of 240 pages. Among other popular day-by-day pictorial biographies are those of Frank Sinatra, Marilyn Monroe, Judy Garland, Ernest Hemingway, Elvis Presley, The Beatles, and Eric Clapton.

Flynn's colourful life was lived out on the world stage and a better candidate for a book of this style would be hard to find.

Killer Looks

The Forgotten History of Plastic Surgery in Prisons

By Stone Zara

Killer Looks is the definitive story about the long-forgotten practice of providing free nose jobs, face-lifts, breast implants, and other physical alterations to prisoners, the idea being that by remodelling the face you remake the man. From the 1920s up to the mid-1990s, half a million prison inmates across America, Canada, and the U.K willingly went under the knife, their tab picked up by the government. In the beginning, this was a haphazard affair -- applied inconsistently and unfairly to inmates, but entering the 1960s, a movement to scientifically quantify the long-term effect of such programs took hold. And, strange as it may sound, the criminologists were right: recidivism rates plummeted. In 1967, a three-year cosmetic surgery program set on Rikers Island saw recidivism rates drop 36% for surgically altered offenders. The program, funded by a \$240,000 grant from the Department of Health, Education, and Welfare, was led by Dr. Michael Lewin, who ran a similar program at Sing-Sing prison in 1953.

Killer Looks draws on the intersectionality of socioeconomic success, racial bias, the prison industry complex and the fallacy of attractiveness to get to the heart of how appearance and societal approval creates self-worth, and uncovers deeper truths of beauty bias, inherited racism, effective recidivism programs, and inequality.

A Disreputable Opening Repertoire

Tait Jonathan

A highly adventurous repertoire designed to meet 1 e4 with 1...e5 and take the initiative! The main problem Black faces in answering 1 e4 with 1...e5 is the plethora of opening systems available to White: the Ruy Lopez, Giuoco Piano, Scotch, Ponziani, King's Gambit, Vienna, Bishop's Opening and so on. Each is likely to be White's pet line, which usually means conducting the chess battle on the opponent's turf. One solution is to study the main lines of all these openings and hope to remember what to do if they appear on the board. Another, more enterprising approach is to turn the tables and make White fight on your territory. Adopting the latter course, CC-SIM Jonathan Tait shares their investigations into a myriad of disregarded, "disreputable" responses, which can set White thinking as early as move three. These lines are greatly under-estimated by contemporary theory and include weird and wonderful variations such as the Calabrese Counter-Gambit.

Trekking the Cathar Way 2/e

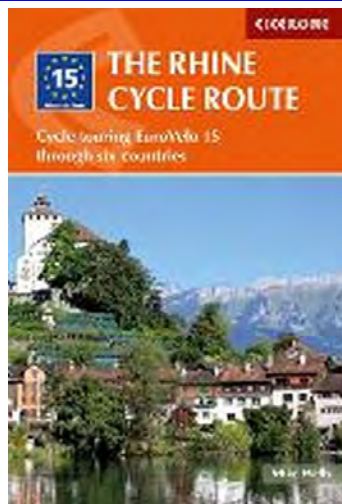

The GR367 Sentier Cathare in southern France

By Smith Luke

Two of the southernmost departments of France, the Pyrenees-Orientales and Ariege are inextricably linked with the history of the Cathars, a heretical Christian sect who were subjected to a crusade in the thirteenth century. Striking castles built on jagged rocky precipices are a highlight of the region and a reminder of those turbulent times. This guidebook describes the 260km Cathar Way, a long-distance trail from Port-la-Nouvelle on the Mediterranean coast to Ariege's departmental capital Foix linking several of the impressive Cathar castles. The route follows ancient footpaths, jeep tracks and country lanes and calls for a moderate level of fitness as it sweeps from sea level to 1300m across the rugged hill ranges of the Corbieres and Fenouilledes.

The guide describes the main route in 13 stages and includes the slightly more direct north variant, as well as suggestions for shorter itineraries. Summary statistics introduce each day's walking and are followed by step-by-step route description illustrated with clear mapping. There are also details of facilities available en route and accommodation listings. An introduction covers all the practicalities, with comprehensive advice for planning your trip - including when to go, how to get there and what to take - in addition to a wealth of information about the region's fascinating history and the intriguing Cathars themselves.

The Rhine Cycle Route 4/e

Cycle touring EuroVelo 15 through six countries

By Wells Mike

This comprehensive guidebook to EuroVelo route 15 offers a detailed stage-by-stage description of the 1370km route along the Rhine, one of Europe's great rivers, passing through six countries on its way from Switzerland to the North Sea. The cycling is easy, downhill and along dedicated cycle lanes, the countries visited are very cycle-friendly and the waymarking is excellent. The whole trip can be completed in two weeks by a fit cyclist. The guide includes plenty of information to help you plan your trip, with advice on travel, accommodation and facilities. The full route is presented in 27 stages of 32-69km, with step-by-step route description, 1:100,000 mapping and notes on local points of interest.

A facilities table, glossary and list of useful contacts can be found in the appendices. Starting in the Swiss Alps with high mountains, deep glacial valleys and gorges, it soon reaches Europe's third largest lake, the Bodensee, and its greatest mainland waterfall.

After Basel, the Rhine becomes a broad river, now the world's busiest river trading artery. The middle Rhine, between Bingen and Koblenz, forces its way through the narrow rocky Rhine gorge, lined by romantic castles perched above Germany's finest vineyards. Finally, the river passes through low-lying Holland, famed for its many flood dikes and windmills.

Lyme

The First Epidemic of Climate Change

By Pfeiffer Mary Beth

"Superbly written and researched." -Booklist "Builds a strong case." -Kirkus.

Lyme disease is spreading rapidly around the globe as ticks move into places they could not survive before. The first epidemic to emerge in the era of climate change, the disease infects half a million people in the US and Europe each year, and untold multitudes in Canada, China, Russia, and Australia.

Mary Beth Pfeiffer shows how we have contributed to this growing menace, and how modern medicine has underestimated its danger. She tells the heart-rending stories of families destroyed by a single tick bite, of children disabled, and of one woman's tragic choice after an exhaustive search for a cure.

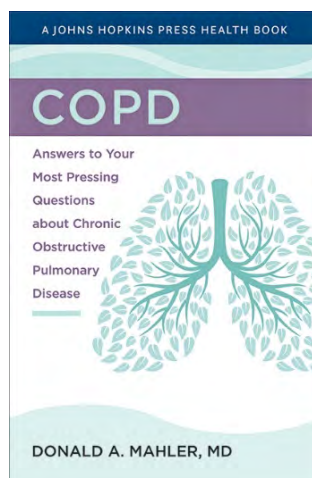

Pfeiffer also warns of the emergence of other tick-borne illnesses that make Lyme more difficult to treat and pose their own grave risks. *Lyme* is an impeccably researched account of an enigmatic disease, making a powerful case for action to fight ticks, heal patients, and recognize humanity's role in a modern scourge.

Author Bio:

Mary Beth Pfeiffer has been an investigative reporter for three decades and is the author of *Crazy in America: The Hidden Tragedy of Our Criminalized Mentally Ill* (Carroll & Graf Publishers/Basic Books, 2007).

Diagnosis Female

*Dwass Emily*

Why do so many women have trouble getting effective and compassionate medical treatment? Diagnosis Female examines this widespread problem, with a focus on misdiagnosis and gender bias. The book zeroes in on specialties where women are more likely to encounter particularly troubling roadblocks: cardiology, neurology, chronic diseases and obstetrics/gynaecology. All too often, when doctors can't figure out what is going on, women receive a diagnosis from the "all in her head" column - this pattern is even worse for women of color, who may face significant challenges in medical settings. Throughout the work, Emily Dwass profiles women whose stories illustrate how medical practitioners often dismiss their claims or disregard their symptoms.

Turn the Tide on Climate Anxiety

*Kennedy-Woodard Megan*

It's hard to watch the news, scroll through social media, or listen to the radio without hearing or seeing something disturbing about the climate emergency. This can trigger all sorts of emotions: worry, anger, sadness, guilt, and even grief but also often over-looked positive emotions like motivation, connection, care, and abundance that support mental health and climate action for sustainable longevity. Written by psychologists with extensive experience in treating people with eco-anxiety, this book shows you how to harness these emotions, validate them, and transform them into positive action. It enables you to assess and understand your psychological responses to the climate crisis and move away from unhealthy defence mechanisms, such as denial and avoidance.

Photo Restoration

By Brown Margaret

Key Sales Points:

* Expert, easy to follow advice on how to bring your old photos back to life. * Several case studies provide step by step fixes for some of the most common blemishes in old photographs, * High quality book design and insightful sample images.

Restoration of some damaged photos can be quite simple and achievable with a couple of clicks and slider adjustments, while other images can be much harder to fix and involve a lot of detailed work. Photo Restoration starts by showing you the best ways to digitise your old prints - scanning options, advice on settings, image resolution, re-sizing and cropping in preparation for retouching. We advise what to look for in editing software and how to use restoration tools including Colour correction, Contrast adjustment, Sharpening, Dodging and burning, Dust and scratch removal, Clone stamp, Healing brush, and some of the more advanced solutions like Content aware corrections and Content filling algorithms that can help recreate missing parts of a photo. Today's editing/retouching tools are powerful, but repair of some damaged images is beyond the skill of most amateur photographers. We help you identify when it might be better to rely on the expertise of professional photo restoration services. And we show you the best ways to store, organise, share and display your restored images.

A Complicated Choice

Making Space for Grief and Healing in the Pro-Choice Movement

By Zeh Katey

A Complicated Choice addresses the fact that abortion stigma is ubiquitous, even among those who identify as pro-choice. We have not been supportive of people who have abortions, especially those whose experiences are complicated and involve grief and loss. Bringing the reader along the journeys of those who have had abortions, Rev. Katey Zeh opens space for the complexities of our reproductive lives, giving voice to the experiences of grief, loss, and healing surrounding abortion experiences. She weaves these personal stories with key insights from the fields of psychology, theology, and public policy to illuminate the systemic injustices that undergird the conditions that shape a person's decision to end a pregnancy.

A Complicated Choice goes beyond the falsely simplistic terms "pro-life" and "pro-choice" that define the public abortion debate and centres the real people making the decision to end a pregnancy in the context of their full lives and circumstances. A call to people of faith and to all people to examine our judgments about people who have abortions, we are invited into the act of sacred listening to the real stories of those most impacted. By focusing on these experiences, we will be drawn away from the stalemate of debate and into a spiritual response rooted in compassion for those who end pregnancies.

Innocent Until Proven Muslim

Islamophobia, the War on Terror, and the Muslim Experience Since 9/11

By Hilal Maha

On September 11, 2001, nineteen terrorists hijacked four airplanes and carried out attacks on the United States, killing more than three thousand Americans and sending the country reeling. Three days after the attacks, President George W. Bush declared, "This is a day when all Americans from every walk of life unite in our resolve for justice and peace." Yet in the days following, Bush declared a "War on Terror," which would result in years of Muslims being targeted.

In *Innocent until Proven Muslim*, scholar and organizer Dr. Maha Hilal tells the powerful story of two decades of the War on Terror, exploring how the official narrative has justified the creation of a sprawling apparatus of state violence rooted in Islamophobia and excused its worst abuses. Hilal offers not only an overview of the many iterations of the War on Terror in law and policy, but also examines how Muslim Americans have internalized oppression, how some influential Muslim Americans have perpetuated collective responsibility, and how they lived experiences of Muslim Americans reflect what it means to live as part of a "suspect" community. Along the way, this marginalized community gives voice to lessons that we can all learn from their experiences, and to what it would take to create a better future.

Australia's Dangerous Bush Creatures

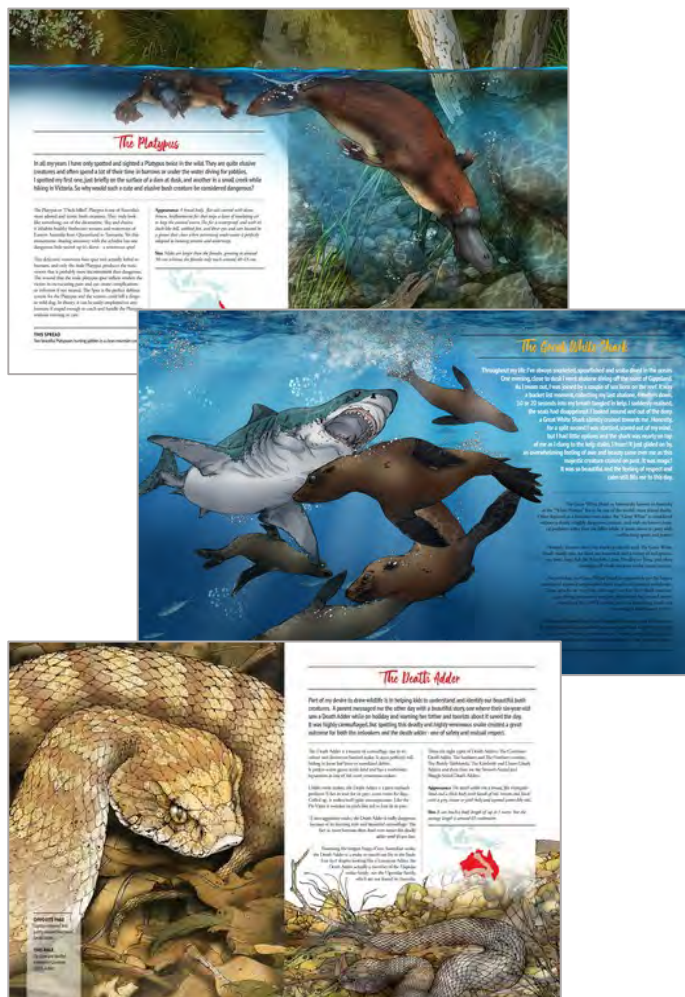

By **Myke Mollard**

Key Sales Points:

- * Companion book to Myke's bestselling An A-Z of Australian Bush Creatures (9781925868685).
- * Great value hardcover at \$24.99.
- * Powerful botanical-like drawings are created in a graphic style that's likened to a comic book.

Age Range: from c 3 years

Myke Mollard's signature illustrations and engaging text bring kids up close and personal with 47 of Australia's most deadly and dangerous creatures, helping them to discover the true nature of these wonderful animals. As fearsome as many of them sound, what they will come to realise on reading this book is that these creatures live mostly peacefully among us. Their deadly venoms, scary teeth and animal behaviour are normally just used as warning signs or, rarely, in defence. In reading, children will come to understand these creatures better, gain courage and form a proper respect for them. The beauty, majesty and wonderment of these stunning creatures, delivered in an engaging cinematic punch, will excite the imaginations of children for life.

Author Bio:

Myke Mollard is a children's educator, illustrator, author and designer – just some of his creative talents. He began his career in graphic design, branding management and producing commercials for TV. He later found outlets for his passion for educating kids about the world around them, both in person in classroom and online settings, and via his books which he fully writes and illustrates himself. One of his first books, in 2008, was the best-selling A-Z of Australian Bush Creatures which sold 85,000 copies in the early 2010s. He is also the author of On a Monsters Doorstep which completely sold out its 10,000-copy hardback run.

Australia's wild creatures are facing a fast-changing environment that has humankind's fingerprint all over it and hundreds are in danger of complete extinction. We can't save what we don't know or understand: awareness is paramount to helping these endangered creatures survive into the lifetimes of future generations. Myke Mollard's signature illustrations and engaging text bring kids up close and personal with 134 of Australia's most endangered creatures, highlighting both the common and uncommon threats to each species and revealing the fragile balance existing in nature and how our human impact is collapsing ecosystems and unbalancing the natural world. While some of these creatures may be iconic and well-studied, many of them are less known: all have their plight, beauty and character delicately presented in this important new book.
