**Putin's Playbook**

Russia's Secret Plan to Defeat America

**By Koffler Rebekah**

**Key Sales Points:**

- \* Includes new introduction for Australian edition.
- \* A timely and essential read in these turbulent political times and with Russia's invasion of Ukraine. Putin's Playbook exposes how Russia wants to reshape the world in its own image and how America is on a geopolitical collision course with Russia. \* Brings an insight only a Russian-born analyst could have. Rebekah Koffler is a US intelligence expert who has briefed the Pentagon, the White House, and NATO on Russian affairs.

**Publicity:**

- \* National coverage in newspapers and publications including The Guardian and The Australian. \* Television including Outsiders (#1 rated show on Sky News)/ \* Radio interviews including 2GB and 3AW. \* 06/03 - Rowan Dean Outsiders, Sky News interview with Rebekah Koffler.

The 'Russian collusion' hoax not only poisoned American politics but also sowed confusion about the real Russian threat to the United States. President Vladimir Putin wasn't colluding with the Trump campaign, but as a former U.S. intelligence specialist makes clear in this eye-opening book, the judo-loving ex-KGB agent most certainly has a plan to defeat the United States. Born and raised in the Soviet Union, Rebekah Koffler came to America as a young woman. After 9/11, she joined the Defense Intelligence Agency, devoting her career to protecting her new country. Now she reveals in chilling detail Putin's long-range plan - his 'playbook' - to weaken and subdue the United States, preparing for the war that he believes is inevitable. With the insight of a native, Koffler explains how Russians, formed by centuries of wartorn history, understand the world and their national destiny. Seeing himself as the modern 'Czar Vladimir' of a unique Slavic nation at war with the West, he is determined to restore Russia to its place as a great power. Koffler's analysis is enriched by her deeply personal account of her life in the Soviet Union. Devoted to her adopted homeland but concerned about the complacency of her fellow citizens, she appreciates American freedoms as only a survivor of totalitarianism can. An opportunity to view ourselves and the world through the eyes of our adversary, *Putin's Playbook* is a rare and compelling testimony that we ignore at our peril.

No captain of the Australian Test cricket team—and there have now been 47 of them—has ascended to the most revered throne in Australian sport in such excruciatingly sad circumstances than the golden boy Pat Cummins. And few have been immediately confronted with such a weighty first assignment—or so much goodwill. Australian cricket—indeed, the game at large—was being confronted by issues of image and culture in various ways and Cummins' arrival in a position of such power and influence on and off the field of play had a lot going for it.

*Captain Pat: Cometh the Hour, Cummins the Man* is the first book to focus on the Australian international cricketer and Captain of the Australian Test team. From his early life to his arrival as a Test cricketer at a remarkably early age, his frustrations with injury, and his arrival as the 47th Australian Test Captain, he is a player who took Australia and the cricket world by storm the moment he first donned the famous baggy green cap. Award-winning sports writer Ron Reed pays tribute to Pat Cummins and examines his scorecard: how has he played, how did he lead, how was he rated by the fans, and what is his future?

**Fault Lines**

Social Justice and Evangelicalism's Crisis

**By Jr. Baucham Voddie T.****Key Sales Points:**

Reflects on the current culture wars in the US over racism and Critical Race Theory (CRT) and the impact on the evangelical church. \* The author writes clearly about the complex history, terms and bottom-line relevance of Critical Race Theory. \* A clarion call and a plea to the Church. Author Voddie Bauchman wants to unmask the ideology of Critical Theory, Critical Race Theory, and Intersectionality in hopes that those who have imbibed in it can have the blinders removed from their eyes, and those who have bowed in the face of it can stand up, take courage and 'contend for the faith that was once for all delivered to the saints'.

**Author Bio:**

Voddie Baucham Jr. is a pastor and church planter who is currently serving as dean of the School of Divinity at African Christian University in Lusaka, Zambia, where he and his family have lived since 2015. Dr. Baucham (D.Min., Southeastern Baptist Theological Seminary) wears many hats. He is a husband, father, pastor, author, professor, conference speaker and church planter. He is the author of *The Ever Loving Truth* (B&H, 2004), *Family Driven Faith* (Crossway, 2007), *The Supremacy of Christ in a Postmodern World* (Piper & Taylor, eds.; Crossway, 2007), and *What He Must Be* (Crossway, 2008).

The death of George Floyd at the hands of police in the summer of 2020 shocked America and the world. As riots rocked American cities, Christians affirmed from the pulpit and in social media that 'black lives matter' and that racial justice 'is a gospel issue'. But what if there is more to the social justice movement than those Christians understand? In this powerful book, Voddie Baucham, a preacher, professor, and cultural apologist, explains the sinister worldview behind the social justice movement and Critical Race Theory—revealing how it already has infiltrated some seminaries, leading to internal denominational conflict, cancelled careers, and lost livelihoods. Like a fault line, it threatens American culture in general—and the evangelical church. Whether you're a layperson who has woken up in a strange new world and wonders how to engage sensitively and effectively in the conversation on race or a pastor who is grappling with a polarised congregation, this book offers the clarity and understanding to either hold your ground or reclaim it.

## Acts of Cruelty

*Crowe Aileen*

This book documents the complex, drawn out and harsh legal procedures and historically racist and toxic immigration culture that await people arriving by plane and subsequently seeking refugee status in Australia. This story has hitherto been sidelined because of the more notorious offshore detention policies of successive Australian governments for people arriving by boat. In this book, research by Dr Aileen Crowe, a Franciscan nun and refugee advocate, provides both detailed insight into the lived experiences of such would-be migrants and the tangle of immigration processes and laws which they must navigate at their peril. The author's support and advocacy role bring her close to individuals and families attempting to escape numerous forms of persecution in their own countries as they confront further trauma in seeking Australia's protection. The book is an important and challenging document for potential migrants and asylum seekers, politicians, lawyers, students of international relations, and the public internationally.

## Madonna Song by Song

*By Andrews Marc*

In a career full of 'blond ambition', with controversy never far away, the music of Madonna has often been overshadowed, if not sorely overlooked. Across 14 albums, soundtracks and numerous greatest hits collections, the undisputed Queen of Pop has released over 80 singles spanning five decades. In this book every released track from her extensive back catalogue is examined in detail, with new insights, revelations and video information. Her role as 'Queen of Clubs' is also duly acknowledged, making careful note of the important remixes that have helped her rule the dance floor after her first release 40 years ago in 1982, 'Everybody', got her firmly into the groove. From 1984's shiny and new 'Like A Virgin', to the critical acclaim of 1989's expressive 'Like A Prayer' and 1998's enlightening 'Ray of Light', from soundtrack work for 'Dick Tracy' and 'Evita', to collaborations with superstars Justin Timberlake, Britney Spears, and Dua Lipa, this truly strikes a pose for any fan of the 'Material Girl' aka 'Madame X'. 'Madonna: Song By Song' reclaims her stature as not just one of the greatest pop artists ever, but also as songwriter/producer of some of the biggest selling and most memorable songs of all time.

**Blake Shelton**

Happy Anywhere

*By Cash Large Carol*

Watch Blake Shelton's career begin and flourish from the viewpoint of a lifelong friend who moved the award-winning musician to Nashville when he was seventeen and has been with him every step of the way. In *Blake Shelton: Happy Anywhere*, Carol Cash Large takes you backstage for personal and unique insight into the life of the young singer. Large starts at the beginning, when Shelton worked with producer Bobby Braddock, recorded his #1 song "Austin," and performed on the Grand Ole Opry. She shares his victories and the rise in fame when he started garnering nominations at award shows and then recorded seventeen consecutive #1 songs. Large's favourite stories come from Shelton's time as host and entertainment on Saturday Night Live and his induction into the Grand Ole Opry. But, she says, landing a gig as a coach of the NBC hit, *The Voice*, had the biggest impact on his career. Along with his music career success and fame, Large delves into his personal life, showing his penchant for entertaining and bringing smiles to his friends and family. She also recounts stories about Shelton's marriages to Kaynette Williams and Miranda Lambert, and the joy he has found with Gwen Stefani. With fifty personal photos from the author's collection and a close connection to Blake Shelton, Carol Cash Large presents a warm, detailed account of one of country music's biggest stars of all time.

## Craft Beer

The 365 Best Beers

**By Peel Dan**

Over the past decade, beer has changed forever. Gone are the days when craft beer was a fad, a niche activity enjoyed by the few and comparatively inaccessible for many who sought it out. Nowadays, craft beer is a truly global phenomenon that can be experienced almost anywhere in the world, from the U.S. to Japan to New Zealand and almost anywhere in between.

In this book you will find a collection of beers that we have arrogantly called 'the best beers in the world' and all of them are stunners. 'Best' is completely subjective of course, and you'll have to try them for yourself to see if you agree. Some you will be able to pick up right on your doorstep, and others may take considerable effort to find if you ever hope to try them.

Regardless, we hope this collection of beers sends you on an exciting journey into the heart of our favourite fermented beverage.

## Simply More Greek

Foods From the Garden, The Sea and the Bakery

*By Bardis Ruth*

This book is exactly what the title says, *Simply More Greek*. It is a unique compilation of simple to prepare, classical foods eaten mostly in villages, towns, and monasteries throughout Greece, based on fresh produce from the garden, seafood from the vast surrounding sea, and baked pies and sweets. There are no meat dishes in this book. Meat free meals are mostly consumed throughout the year in Greece due to the vast number of fasting days. The meals chosen for this book are largely unfamiliar and absent from other Greek cookbooks. Such foods as *pastitsio* and *stifado* made with mushrooms, sardines wrapped in vine leaves, silver beet rolls stuffed with rice and herbs, stuffed onions with spices and pine nuts. There are legumes with greens, seafood with raisins, octopus with honey, fresh salads and various dips. Baked breads such as feta cheese and fennel bread rings, greens, cheese and other variety of pies and different ways to make pastry. To end there is a selection of desserts such as rice pudding cake, apple cake with whiskey, pastry parcels with nuts, yogurt jelly cake, and plenty more.

The aim of this book is to aspire, educate, and discover more traditional foods. It is written to entice the avid pescatarian, vegetarian or those wanting to eat more seafood, vegetables, and or, the person eager to open their horizon to more Greek meals, half of which are gluten free. This book is divided into four main chapters and sub chapters. Chapter one is based on the Garden and subdivided into three parts: Fresh, cooked and accompaniments. Chapter two is wholistically seafood recipes. Chapter three is home to the Bakery. The final chapter is titled 'The Garden and its Nutrients'. A summary of the generally consumed herbs, fruits and vegetables used throughout the book and from a Greek garden.

## Chess for Schools

From simple strategy games to clubs and competitions

*By James Richard*

Chess is a game of extraordinary excitement and beauty, with an impressive literature, history and heritage accumulated over the past thousand years. All children should have the opportunity to learn this wonderful game, and indeed many claim that playing abstract strategy games such as chess provides a wide range of cognitive and social benefits – such as improvements in problem-solving ability and communication skills.

However, Richard James argues that, because of the complexity of chess, most younger children would gain more benefit from simpler chess-based strategy games and incremental learning.

In this practical handbook, Richard provides a wide range of games and puzzles appropriate for primary schools based on these principles and explains how teachers can identify children who would benefit from starting young.

Richard also sets out how this approach can engage the whole community, including working with children with special needs, getting parents involved in learning and playing, and developing partnerships between primary and secondary schools.

## The AI Revolution in Chess

*By Doknjas Joshua*

In 2018 DeepMind published the shocking results of their chess-playing artificial intelligence software, AlphaZero.

Chess players looked in disbelief and immediately wondered how AI would affect the future of chess. Less than a year later, a whole new wave of chess engines emerged that were based on using neural networks to evaluate positions in a completely new way.

This book is about the extraordinary impact that AI has had on modern chess.

The games of top chess players since the end of 2018 have reflected the use of these new engines in home analysis. They have significantly developed opening theory as well as the general understanding of middlegame concepts. By analysing these games with the help of neural network engines, FIDE Master Joshua Doknjas discusses numerous exciting ideas and examines areas of chess that had previously been overlooked. With thorough explanations, questions, and exercises, this book provides fascinating material for masters and less experienced players alike.

## The Greatest Sailing Stories Ever Told

*Caswell Christopher*

For thousands of years, man has sailed into battle, sailed for rumoured wealth, and sailed for pure adventure. And for nearly as long, stories about the sea have entertained, intrigued, and inspired readers. The *Greatest Sailing Stories Ever Told* brings together some of the most compelling writing of the millennium. Here is Peter Goss's wrenching narrative of incredible courage in the world's most desolate ocean; Ernest Shackleton's understated and awesome account of one of the most daring small-boat journeys ever taken, where failure meant certain death for his long-suffering crew. But sailing is much more than headlong dashes into roaring seas. You'll also find William F. Buckley Jr. on idyllic cruising; James Thurber on the arcane and often impenetrable language of sailors; the legendary Joshua Slocum on sailing alone around the world.

## Walking the Brittany Coast Path

*Dorgan Carroll*

This guide describes a 624km section of French long-distance route the GR34, following the north coast of Brittany from ever-popular Mont-Saint-Michel to the port of Roscoff. (The full GR34 - also known as 'Sentier des Douaniers', the Customs Officers Path - totals some 2000km and follows in the footsteps of customs officers of old who patrolled the coast in attempt to curb smuggling.) The trail is waymarked and well maintained, offering mainly easy walking, though there are a few more strenuous sections and some short steep ascents and descents. It takes around a month to complete but the guide also includes suggestions for four five-day 'highlight' sections.

**Author Bio:**

Founded by mum of 2, Amanda Bucknall (alongside her then 7-year-old son) Time Tokens was created by a parent for parents. Amanda experienced first-hand the frustration and agitation a child's unmoderated screen time use can have on the whole family and decided to do something about it. The Time Tokens system provides a solution both parent and child are reassured by. Plenty of tech time, and plenty of time for screen-free fun too.

## Hattie Hates Hugs

*Sarah Hovorka and Illust. by Heather Brockman Lee*

Hattie loves her family, but she hates hugs! While at a family reunion, Hattie wants to play horseshoes with Uncle Jake and Aunt Celia, but her boisterous relatives keep hugging her. Hattie's stomach squirms uncomfortably when she's hugged but dodging and hiding from the open arms isn't working. Great-Grandma is the only relative who understands how Hattie feels. With Great-Grandma's help, Hattie learns to use simple but clear body language with verbal reinforcement to set boundaries around her personal space and to assert her right to consent to physical touch. And she even wins a game of horseshoes! This picture book will teach huggers and non-huggers alike the importance of respecting people's personal boundaries and provides an example of how to advocate for yourself with confidence.
