## Silo Art

Australia's Outdoor Art Revolution

By Alasdair McGregor

### Key Sales Points:

- \* A never-before-seen insight into the contemporary art of Australia's great 'outdoor galleries'.
- \* Explore the artists and rural towns that underpin this people's art movement.
- \* Beautiful illustrations and commentary on a unique and unusual Australian artform.
- \* Written by award-winning author Alasdair McGregor.

Australia is fast becoming a giant outdoor art gallery.

From epic painted silos across Victoria's mallee region, to grand murals transforming towns like Tumby Bay in South Australia and the popularity of outdoor art festivals such as Sheffield's Mural Fest in Tasmania, it seems there are few bare surfaces that haven't caught the eye of a growing band of talented outdoor artists.

In this richly illustrated coffee table book, award-winning author, and respected artist in his own right, Alasdair McGregor explores the creative and community forces driving this grass roots art movement.

He visits the small towns where dreams of joining the burgeoning Silo Art Trail have united rural communities in efforts to transform their faded agricultural heritage into grand visions that instil pride and bring the tourists in.

He meets some of the characters at the heart of the rural art movement and delves into the stories behind the faces in the paintings.

He profiles the artists, many of whom began as graffitiists, but who are now in demand around the world for their jaw dropping ability to transform massive surfaces with paint, often in record time.

## An Oasis in the Wilderness

The Foundation Years of the Sydney Mechanics' School of Arts

By Lesley Scanlon

### Key Sales Points:

- \* Immersive and evocative, Dr Scanlon guides her readers across the ocean to Sydney's early settlement, through to Sydney's social scene (from elites to convicts), to the Sydney Mechanics' School of Arts itself as readers meet its founders, attend lectures, marvel at scientific experiments, and rub shoulders with its students.
- \* Extensively researched from several old and contemporary sources, this text is highly accurate and historic.
- \* With quotes, maps, illustrations, lecture topics, scientific marvels, etc., immersing readers into the context in which the SMSA was engendered, Dr Scanlon's text offers an authentic and window-like glimpse into Sydney's fledgling colony—that is, the social surroundings and intellectual schools of thought in the early to mid-nineteenth century.

### Author Bio:

Dr Lesley Scanlon is a practitioner, researcher, and author in adult education. As a practitioner Lesley has worked in schools, the British Council, Hong Kong, Technical and Further Education, Newcastle University, the University of Technology and Sydney University. She has worked across a range of disciplines teaching and lecturing in the fields of sociology, anthropology, research methodologies, history, and Mandarin. Her eclectic interests culminated in her work as a senior lecturer in teacher education at the University of Sydney, where she continues to hold an honorary position. She has published books on a range of educational issues, written articles for peer-reviewed journals and presented at national and international conferences. Lesley brings a narrative turn to her research, drawing on historical and sociological methodologies to highlight the role of the individual embedded within multiple contexts.

Hailed in the mid-nineteenth century as “an oasis in the wilderness”, the Sydney Mechanics' School of Arts was founded in 1833 to “diffuse scientific and other useful knowledge” to the skilled workingmen of the fledgling European settlement of Sydney. Established in emulation of the burgeoning mechanics' movement in Britain, the founders of this school viewed knowledge as a kind of alchemy that had the potential to change the individual and society.

Taking the reader on a series of journeys, Dr Lesley Scanlon's *An Oasis in the Wilderness: The Foundation Years of the Sydney Mechanics' School of Arts (1833–1851)* situates the activities of the school during its formative years within the social and intellectual contexts of early nineteenth century Britain and New South Wales. More than just the history of the foundation of the School of Arts, this book provides a window through which the reader glimpses aspects of the social and educational milieu of Britain and Sydney's early settler society.

### The Grampians Peaks Trail

The complete guidebook to Victoria's new multiday walk

By Julie Mundy, Debra Heyes

#### Key Sales Points:

- \* First independent guide to the GPT, complementing the official map.
- \* Extensive planning notes ensure the reader will be fully prepared for the adventure.
- \* Written for campers and day walkers and helps build a variety of multi-day itineraries.

Victoria's multi-day Grampians Peaks Trail covers 164 kilometres of spectacular scenery and challenging hiking from Mt Zero in the North to Dunkeld in the South, traversing three major mountain ranges along the way.

Over 13 varied days, the GPT takes in almost the same amount of elevation and descent as it would be to climb Mt Everest. This book is richly illustrated with full-colour photographs and detailed maps for each section.

As well as extensive planning notes, there are detailed walk notes for each of the 13 official days walks, tailored for both day walkers and campers, and optional itineraries for 4-9 days, with flexible 'build your own walk' options. The book also contains much information on the local history, environment, and wildlife.

Deb Heyes and Julie Mundy have been keen walkers their whole lives, and have been walking together for over 15 years, including a wild and wonderful adventure to Patagonia. This is Julie's seventh and Deb's fourth walking guidebook for Woodslane Press, and researching, walking, and writing them is both full on and wonderful. They have walked many of the previously existing GPT sections several times over the years but found walking the completed trail to write this guide as pleasurable an experience as ever.

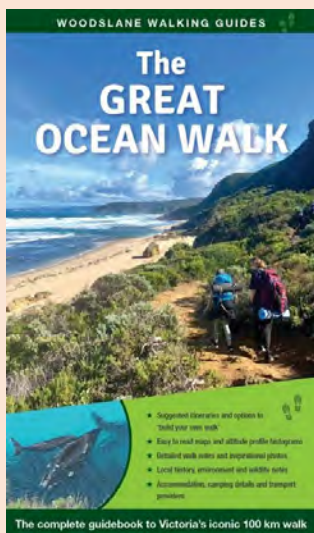

### Six Foot Track Updated 2/e

The classic Blue Mountains long-distance track

By Matt McClelland

The Six Foot Track is one of Australia’s classic long-distance walks. Set in the World-heritage listed Blue Mountains region, experience the challenge of this 44-kilometre-long trek as you journey down dramatic escarpments, across wide rivers and through remote bushland. The second edition of this book uses a delightfully quirky and original format. The first half of the book presents walk directions running from Katoomba to Jenolan Caves. Turn the book upside down, and you can read walk directions running from Jenolan Caves to Katoomba. Navigation and trip planning are made easy with full-colour maps and detailed walk statistics, including distance, total ascent, and descent, walk grades and estimated times.

### Elevate

**How to lift the quality of thinking in your team's board papers without rewriting them yourself**

*By Davina Stanley*

Few people, it seems, enjoy Board papers. They are a necessary part of corporate life but are often dreaded by those who must write and maintain them. Despite best efforts, leaders and Board members frequently complain about the mediocrity of papers, making the task even harder for the writers. Those writing them dislike playing red-pen ping pong iterating on drafts, spending nights and weekends wading through stakeholder comments, enduring Board meetings focused on clarifying rather than debating important issues. In Elevate, Davina Stanley, helps you lift the quality of thinking in your papers and deliver them in a fraction of the time. **R for Data Analysis in easy steps 2/e**

*By Mike McGrath*

The R language is widely used by statisticians for data analysis, and the popularity of R programming has therefore increased substantially in recent years. The emerging Internet of Things (IoT) gathers increasing amounts of data that can be analyzed to gain useful insights into trends.

R for Data Analysis in easy steps, 2nd edition has an easy-to-follow style that will appeal to anyone who wants to produce graphic visualizations to gain insights from gathered data. The book begins by explaining core programming principles of the R programming language, which stores data in "vectors" from which simple graphs can be plotted. Next, it describes how to create "matrices" to store and manipulate data from which graphs can be plotted to provide better insights. This book then demonstrates how to create "data frames" from imported data sets, and how to employ the "Grammar of Graphics" to produce advanced visualizations that can best illustrate useful insights from your data.

Updated for the latest version of R.

## Sticky Dogs and Stardust

### When the Legends Played in the Leagues

By *Scott Oliver*

The golden age of this type of story has now passed. The reasons are obvious. Chief among them is the earning power of top players, both from central contracts and on the franchise Twenty20 circuit, as well as the fact that international and franchise schedules increasingly impinge upon the UK summer. These stories are not entirely obsolete, however, although they will most often involve players taking their first steps on the road to superstardom, future stars before they became household names. Then there are players in the twilight of their careers, if not former stars, then certainly with their highest peaks behind them. And between the springtime baby steps and the autumnal last knockings, there are a clutch of chapters involving cricketers in their high-summer pomp, living legends treading the league cricket boards. These magical stories are unique to cricket.

## An ID Guide to Garden Birds of Britain and North-West Europe

By *Dominic Couzens*

An Identification Guide to Garden Birds of Britain and North-West Europe is a photographic identification guide to 75 species of bird most found in or over the gardens of Britain and North-West Europe. The text combines scientific facts with affectionate descriptions of the birds' identifying features, including sex and age differences, habits, nest types, eggs, and calls. The introduction contains tips on how to identify birds; how to look after garden birds; which species can be seen through the year; a glossary and anatomy details. For each species there are two or three photographs labelled with distinguishing features where appropriate, a calendar showing the time of year when the adult can be seen and star facts that give further proof of the birds' fascinating features.

**Soul of Lisbon**  
30 unforgettable experiences that capture the soul of Lisbon

*By Jonglez Publishing*

Drink a cocktail that takes you back in time, slip into a pocket-sized bookstore, unlock the secrets of bacalhau, run with the clouds, make a stopover in the tropics, track down the restaurant whose address we won't tell you, clink glasses with an old-timer, awaken your inner ceramics-maker, scuffle with a spider crab, infiltrate the secret hide-away of the city's fado singers, bite into an elephant-ear cookie made to linger in your memory forever ... Soul of Lisbon is written by Lauriane Gepner, journalist and traveller, and Fany Pechiodat, founder of My Little Paris, the influential newsletter-cum-lifestyle brand. You've seen Castelo de Sao Jorge, wandered through the medieval streets, and ridden a tram, what next? If we really want to experience the true essence of Lisbon today, where do we go? Soul of Lisbon is your guide to the best of what this city really is right now - and how it's evolving.

### Australian Backyard Birds

By Myke Mollard

#### Key Sales Points:

- \* Companion book to Mykes bestselling Creatures books.
- \* Great value hardcover at \$24.99.
- \* Powerful, vivid drawings are created in a graphic style that's likened to a comic book.

Myke Mollards signature illustrations and engaging text bring kids up close and personal with over 150 of Australia's colourful and characterful backyard birds.

These are birds most seen in our gardens and surrounding bush and parks. The birds are not only beautifully drafted, but the accompanying text also vividly describes their lifestyles and habits.

The wonderment of these stunning creatures, delivered in an engaging cinematic punch, will excite the imaginations of children for life, and fully engage any adult with a love of birds.

#### Author Bio:

Myke Mollard is a children's educator, illustrator, author, and designer – just some of his creative talents. He began his career in graphic design, branding management and producing commercials for TV. He later found outlets for his passion for educating kids about the world around them, both in person in classroom and online settings, and via his books which he fully writes and illustrates himself. One of his first books, in 2008, was the best-selling A-Z of Australian Bush Creatures which sold 85,000 copies in the early 2010s. He is also the author of Australia's Dangerous Creatures, Australia's Endangered Creatures and Australian Dinosaurs and Mega Beasts.

**Let the Sun Shine In!****A Wilderness Warriors book***By Craig Sheather, Adam Smith, Annabelle Hale***Key Sales Points:**

- \* A new story featuring the Wilderness Warriors (Dad, get off your Phone!).
- \* A engaging story that introduces children to the complexities of blindness.
- \* Wonderfully illustrated by a young up-coming Australian artist.

Frank is blind, but nonetheless loves the outdoors and the feel of the sun on his face. In this new story Frank and his friends (the Wilderness Warriors) go on a camping trip with the intention of getting up early to see the sunrise.

However, on the pre-dawn walk to the lookout the torch batteries die and the group are plunged into darkness. Frank takes over the lead, making his way confidently with his knowledge of the path and his stick, while the others follow.

The story thus delights children while at the same time giving them an insight into the experience of blindness. This is the second in a series of books featuring Lyra, Frank and Charlie, the Wilderness Warriors.

**Author Bio:**

Craig Sheather is a freelance travel and creative writer from Albury in southern New South Wales. He specialises in lifestyle writing about the outdoors, food and wine, luxury, adventure, and family travel. Craig is married with two cheeky young children, so he has also developed a strong interest in children’s books. He has authored three previous children’s books, Sparky the Wonder Puppy, Heroes of Black Summer and Dad, Get off Your Phone! (The first Wilderness Warriors book).

Adam Smith is a person who is blind and who also has a mental health condition. Let the Sun Shine In! is his first book. The narrative aims to help those, especially kids, with a disability, to explore the positive impacts of nature and how having an adventurous spirit is healing. It does this through reflecting on Adam’s own experiences of being disabled and also removes the stigma and silence associated with disability.

# Dad, Get Off Your Phone!

## Dad, Get off your Phone!

A Wilderness Warriors book

By Craig Sheather, Annabelle Hale

### Key Sales Points:

- \* Introduces Lyra, a young nature warrior with a mission to explore with her Dad.
- \* Packs two solid life lessons into one engaging story.
- \* Wonderfully illustrated by a young up-coming Australian artist.

Lyra is an active young lady who wants to get out and explore the world - but her father has turned into a Phone Zombie! He spends all his time lying on the couch working... talking... texting... reading... watching sports. Finally, she persuades him to go for a walk with her in the bush where they see amazing creatures and Dad is gradually converted into a Nature Zombie!

This wholesome tale, hinting at the dangers of the over-use of screens and extolling the benefits of getting out into nature, turns the usual parent-berating-child narrative on its head. The story thus delights children while at the same time tempting them to follow in Lyra's footsteps. This is first in an anticipated series of books featuring Lyra and the Wilderness Warriors.

## The Red Beast Anger Workbook

For All Children Who Want to Tame Their Red Beast Including Those on the Autism Spectrum

By Kay Al-Ghani, Sue Larkey, Haitham Al-Ghani

### Key Sales Points:

\*Interactive workbook to help autistic children learn how to identify anger triggers and develop self-regulation.

This illustrated and interactive workbook will help children find ways to calm their Red Beast and learn how to prevent it from waking in the first place.

Full of practical activities and illustrated examples, it supports the development of emotional and sensory regulation and provides coping mechanisms for children who experience intense emotional flooding or meltdowns as well.

The workbook includes a helpful introduction for adults on the science of self-regulation, clear guidance on how to pace the learning and a wide range of activities such as scenarios to help children explore their anger, anger management plans, and exercises that encourage interoceptive awareness.

It also addresses common causes of anger including perfectionism, winning, and losing and discusses the importance of a positive attitude and using kind words in a child-friendly way. Join Danni and his friends and family as they explore the challenges they face from the Red Beast and how they overcome them.
